The book includes some fifty seminal essays and documents—including statements, interviews, and manifestoes by artists—that encompass the broad diversity of this emerging field. Many of these materials are difficult to access and some are translated here for the first time. Included in this collection are fascinating ideas and insights on the impact of the avant-garde in the 1920s, the Mexican mural movement, Surrealism and other fantasy-based styles, modern architecture, geometric and optical art, concrete and neo-concrete art, and political conceptualism. For students and scholars of Latin American art, the volume offers an invaluable collection of primary and secondary sources. Since it was first published in 1995, *The Wounded Storyteller* has occupied a unique place in the body of work on illness. Both the collective portrait of a so-called “remission society” of those who suffer from some type of illness or disability and a cogent analysis of their stories within a larger framework of narrative theory, Arthur W. Frank’s book has reached a large and diverse readership including

the ill, medical professionals, and scholars of literary theory. Drawing on the work of authors such as Oliver Sacks, Anatole Broyard, Norman Cousins, and Audre Lorde, as well as from people he met during the years he spent among different illness groups, Frank recounts a stirring collection of illness stories, ranging from the well-known—Gilda Radner's battle with ovarian cancer—to the private testimonials of people with cancer, chronic fatigue syndrome, and disabilities. Their stories are more than accounts of personal suffering: they abound with moral choices and point to a social ethic. In this new edition Frank adds a preface describing the personal and cultural times when the first edition was written. His new afterword extends the book's argument significantly, writing about storytelling and experience, other modes of illness narration, and a version of hope that is both realistic and aspirational. Reflecting on both his own life during the creation of the first edition and the conclusions of the book itself, Frank reminds us of the power of storytelling as way to understanding our own suffering.

assessment tools An unabridged reprint of the original published in 1917. This open access book presents the first comprehensive overview of general methods in Automated Machine Learning (AutoML), collects descriptions of existing systems based on these methods, and discusses the first series of international challenges of AutoML systems. The recent success of commercial ML applications and the rapid growth of the field has created a high demand for off-the-shelf ML methods that can be used easily and without expert knowledge. However, many of the recent machine learning successes crucially rely on human experts, who manually select appropriate ML architectures (deep learning architectures or more traditional ML workflows) and their hyperparameters. To overcome this problem, the field of AutoML targets a progressive automation of machine learning, based on principles from optimization and machine learning itself. This book serves as a point of entry into this quickly-developing field for researchers and advanced students alike, as well as providing a reference for practitioners aiming to use AutoML in their work. The perennial New York Times bestselling author returns with an emotionally resonant novel that illuminates the power of friendship in women's lives, and is filled with her trademark wit, poignant and timely themes, sassy, flesh-and-blood characters, and the steamy Southern atmosphere and beauty of her beloved Carolina Lowcountry. Few writers capture the complexities, pain, and joy of relationships—between friends, family members, husbands and wives, or lovers—as beloved New York Times bestselling author Dorothea Benton Frank. In this charming, evocative, soul-touching novel, she once again takes us deep into the heart of the magical Lowcountry where three amazing middle-aged women are bonded by another

amazing woman's death. Through their shared loss they forge a deep friendship, asking critical questions. Who was their friend and what did her life mean? Are they living the lives they imagined for themselves? Will they ever be able to afford to retire? How will they maximize their happiness? Security? Health? And ultimately, their own legacies? A plan is conceived and unfurls with each turn of the tide during one sweltering summer on the Isle of Palms. Without ever fully realizing how close they were to the edge, they finally triumph amid laughter and maybe even newfound love.
