Painting as Model Oct 17 2019 Informed by both structuralism and poststructuralism, these essays by art critic and historian Yve Alain Bois seek to redefine the status of theory in modernist critical discourse. Warning against the uncritical adoption of theoretical fashions and equally against the a priori rejection of all theory, Bois argues that theory is best employed in response to the specific demands of a critical problem. The essays lucidly demonstrate the uses of various theoretical approaches in conjunction with close reading of both paintings and texts.

Brilliant Orange Dec 31 2020 The Netherlands has been one of the world's most distinctive and sophisticated football cultures. From the birth of Total Football in the sixties, through two decades of World Cup near misses to the exiles who remade clubs like AC Milan, Barcelona, Arsenal and Chelsea in their own image, the Dutch have often been dazzlingly original and influential. The elements of their style (exquisite skills, adventurous attacking tactics, a unique blend of individual creativity and teamwork, weird patterns of self-destruction) reflect and embody the country's culture and history. This book lays bare the elegant, fractured soul of the Dutch Masters and the culture that spawned them by exploring and analysing its key ideas, institutions, personalities and history in the context of wider Dutch society.

Architecture Theory since 1968 Apr 03 2021 An anthology of the pivotal theoretical texts that have defined architecture culture in the late twentieth century. In the discussion of architecture, there is a prevailing sentiment that, since 1968, cultural production in its traditional sense can no longer be understood to rise spontaneously, as a matter of social course, but must now be constructed through ever more self-conscious theoretical procedures. The development of interpretive modes of various stripes—post-structuralist, Marxian, phenomenological, psychoanalytic, as well as others dissenting or eccentric—has given scholars a range of tools for rethinking architecture in relation to other fields and for reasserting architecture's general importance in intellectual discourse. This anthology presents forty-seven of the primary texts of architecture theory, introducing each with an explication of the concepts and categories necessary for its understanding and evaluation. It also presents twelve documents of projects or events that had major theoretical repercussions for the period. Several of the essays appear here in English for the first time. The Unfinished Painting Feb 19 2020 Travelling through the history of art from the 15th to the 20th century, this book is a survey of works of art by Old and Modern Masters including Van Eyck, Leonardo, Michelangelo, Rubens, David, Manet, Cézanne, Matisse and Mondrian that have remained deliberately or unintentionally unfinished, and that are usually marginalized in traditional art history. They remain incomplete for various reasons: illness or death of the artist; political turmoil forcing him to flee; disagreements with the commissioner or dissatisfaction with the artistic result. However, from the 16th century onwards, artists started to use the non finito as a tool of expression. Unfinished pictures therefore gained a certain reputation in the romantic era, when they were thought to offer the spectator a glimpse of artistic genius. In the 20th century, these paintings were discovered by cubists, expressionists and abstract painters who were fascinated by their rough and incoherent appearance, often unaware of their history.

Mondrian: the Transatlantic Paintings Apr 22 2020 Just before World War II, Piet Mondrian fled from Paris to London and later to New York, where he lived until his death in 1944. Upon his arrival in Manhattan, the artist began reworking seventeen of the paintings he brought with him, many of which had already been finished and exhibited. He changed lines and added blocks and bars of color to give them what he called "more boogie-woogie." By inscribing these so-called transatlantic works with a double date, for example "38/42," Mondrian emphasized the exceptional history of the series.

Piet Mondrian, 1872-1944 Jun 05 2021 This volume presents Dutch painter Piet Mondrian (1872-1944). His earliest landscapes are rendered in an Impressionistic style but possess the marked vertical and horizontal tendencies that foreshadow his mature paintings. Mondrian's work began to show the influences of Cubism, and in 1912, the artist moved to Paris where he continued to refine his style, continually exploring increasingly sophisticated compositions. In his paintings, Mondrian strove to achieve a universal form of expression by reducing form and color to their simplest components. The artist termed his work "Neo-Plasticism". Mondrian's most well-known works consisted of white ground, upon which was painted a grid of vertical and horizontal black lines and the three primary colors.

Serial Images Mar 02 2021 This book argues that in the works of Degas, Mondrian, Bacon, Schiele and Warhol, serial iteration articulates a process of free, constructive becoming which they interpret in different ways. Not only does the serially iterative structure of the images show that activity and novelty are primary concerns, but it involves the viewer in the activity presented in the images. For these reasons, serial iteration is fundamentally connected both to modernist aspects of the work and to other concerns such as the structure of subjectivity and the movement of history. Serially iterative structure opens up the meaning of these five artists' images by relating them to concerns in contemporary art and thought.

Science and Art Oct 29 2020 Science and art are increasingly interconnected in the activities of the study and conservation of works of art. Science plays a key role in cultural heritage, from developing new analytical techniques for studying the art, to investigating new ways of preserving the materials for the future. For example, high resolution multispectral examination of paintings allows art historians to view underdrawings barely visible before, while the use of non-invasive and micro-sampling analytical techniques allow scientists to identify pigments and binders that help art conservators in their work. It also allows curators to understand more about how the artwork was originally painted. Through a series of case studies written by scientists together with art historians, archaeologists and conservators, *Science and Art:*

The Painted Surface demonstrates how the cooperation between science and humanities can lead to an increased understanding of the history of art and to better techniques in conservation. The examples used in the book cover paintings from ancient history, Renaissance, modern, and contemporary art, belonging to the artistic expressions of world regions from the Far East to America and Europe. Topics covered include the study of polychrome surfaces from pre-Columbian and medieval manuscripts, the revelation of hidden images below the surface of Van Gogh paintings and conservation of acrylic paints in contemporary art. Presented in an easily readable form for a large audience, the book guides readers into new areas uncovered by the link between science and art. The book features contributions from leading institutions across the globe including the Metropolitan Museum of Art, New York; Art Institute of Chicago; Getty Conservation Institute; Opificio delle Pietre Dure, Firenze; National Gallery of London; Tate Britain; Warsaw Academy of Fine Art and the National Gallery of Denmark as well as a chapter covering the Thangka paintings by Nobel Prize winner Richard Ernst.

Piet Mondrian in the USA May 04 2021 This exceptional book on Mondrian's work concentrates on the artist's American period. By birth a Dutchman, Piet Mondrian arrived in New York in September 1940. He died there four years later. A pioneer of abstract art, he was -- like Wassily Kandinsky and Kasimir Malevich -- one of those Western painters remarkable as much for the work he produced as for his writings on the theory of art. Mondrian's celebrity was affirmed immediately after his death, when the first retrospective exhibition of his works given by the New York Museum of Modern Art in 1945 afforded him both global recognition and a place in history. In this book, containing more than 400 reproductions, Mondrian's oeuvre finds new life and a new opportunity, as befits a master whom some would call the artist of his century. Virginia Pitts Rembert, through the skill of being able to pass on her own research and expertise, reveals Mondrian's secret strengths both as an artist and as an innovator.

Inside Out Victory Boogie Woogie Jan 24 2023 The last, unfinished work of Piet Mondrian (1872-194), the Victory Boogie Woogie was acquired in 1998 by the Dutch government and is on permanent loan at the Gemeentemuseum Den Haag. This work is considered one of the highlights of abstract 20th-century art. It had not been investigated properly before. In 2006 a study was therefore initiated with two purposes, namely research into the genesis of the work while studying the current condition. Besides the painting itself, historical sources and the restoration history were taken into account. The purpose of this publication is to shed light on all aspects of this masterpiece, thus contributing to a better understanding of this art work and a better understanding of the artist.00.

The Anatomy Lesson Mar 22 2020 Set in one day in 1632, The Anatomy Lesson is a stunning portrayal of the Golden Age Amsterdam and a brilliantly imagined back-story to Rembrandt's first great work of art. Told from several points of view, ranging from a curio dealer who collects bodies for the city's chief anatomist to philosopher Rene Descartes, the novel opens on the morning of the medical dissection that is to be recorded by the twenty-six-year-old artist from Leiden who has yet to attach his famous signature to a painting. As the story builds to its dramatic and inevitable conclusion, the events that transpire throughout the day sway Rembrandt to make fundamental changes to his initial composition. These changes will remain mysteries for centuries until a young art historian closely examines the painting in the twenty-first century, and makes surprising discoveries about the painter, his process, and his genius for capturing enduring truths about human nature in a single moment.

Authority and Freedom Oct 09 2021 From one of our most widely admired art critics comes a bold and timely manifesto reaffirming the independence of all the arts—musical, literary, and visual—and their unique and unparalleled power to excite, disturb, and inspire us. As people look to the arts to promote a particular ideology, whether radical, liberal, or conservative, Jed Perl argues that the arts have their own laws and logic, which transcend the controversies of any one moment. “Art’s relevance,” he writes, “has everything to do with what many regard as its irrelevance.” Authority and Freedom will find readers from college classrooms to foundation board meetings—wherever the arts are confronting social, political, and economic ferment and heated debates about political correctness and cancel culture. Perl embraces the work of creative spirits as varied as Mozart, Michelangelo, Jane Austen, Henry James, Picasso, and Aretha Franklin. He contends that the essence of the arts is their ability to free us from fixed definitions and categories. Art is inherently uncategorizable—that’s the key to its importance. Taking his stand with artists and thinkers ranging from W. H. Auden to Hannah Arendt, Perl defends works of art as adventuresome dialogues, simultaneously dispassionate and impassioned. He describes the fundamental sense of vocation—the engagement with the tools and traditions of a medium—that gives artists their purpose and focus. Whether we’re experiencing a poem, a painting, or an opera, it’s the interplay between authority and freedom—what Perl calls “the lifeblood of the arts”—that fuels the imaginative experience. This book will be essential reading for everybody who cares about the future of the arts in a democratic society.

On Late Style Jan 12 2022 On Late Style examines the work produced by great artists -Beethoven, Thomas Mann, Jean Genet among them - at the end of their lives. Said makes it clear that, rather than the resolution of a lifetime's artistic endeavour, most of the late works discussed are rife with contradiction and almost impenetrable complexity. He helps us see how, though these works often stood in direct contrast to the tastes of society, they were, just as often, announcements of what was to come in the artist's discipline - works of true artistic genius.

Mondrian Feb 01 2021 Piet Mondrian (1872-1944), who can be assigned to the school of classical modernism, was born in Amersfort, Netherlands. After studying in Amsterdam, he started his artist's career in the impressionist style as a figure and landscape painter. His works from these years showed the influence of Vincent Van Gogh (1853-1890) and of Fauvism, a French school from the beginning of the 20th century. When he traveled to Paris in 1911, he discovered Pablo Picasso's works (1881-1973) and, with that, Cubism. He thereafter became a pioneer of abstract painting in the Netherlands. From the 1920s on, his paintings show a vertical and horizontal composition that, combined with the oppositions of blue, yellow, red, and noncolored spaces, turned into his trademark. His art was very appreciated in New York, where he spent his last years. Mondrian was not only a painter but also an art theoretician and cofounder of the art school De Stijl.

The Afterlife of Piet Mondrian Sep 20 2022 Dutch painter Piet Mondrian died in New York City in 1944, but his work and legacy have been far from static since then. From market pressures to personal

relationships and scholarly agendas, posthumous factors have repeatedly transformed our understanding of his oeuvre. In *The Afterlife of Piet Mondrian*, Nancy J. Troy explores the controversial circumstances under which our conception of the artist's work has been shaped since his death, an account that describes money-driven interventions and personal and professional rivalries in forthright detail. Troy reveals how collectors, curators, scholars, dealers and the painter's heirs all played roles in fashioning Mondrian's legacy, each with a different reason for seeing the artist through a particular lens. She shows that our appreciation of his work is influenced by how it has been conserved, copied, displayed, and publicized, and she looks at the popular appeal of Mondrian's instantly recognizable style in fashion, graphic design, and a vast array of consumer commodities. Ultimately, Troy argues that we miss the evolving significance of Mondrian's work if we examine it without regard for the interplay of canonical art and popular culture. A fascinating investigation into Mondrian's afterlife, this book casts new light on how every artist's legacy is constructed as it circulates through the art world and becomes assimilated into the larger realm of visual experience.

The Art of Rivalry Nov 10 2021 Pulitzer Prize-winning art critic Sebastian Smee tells the fascinating story of four pairs of artists—Manet and Degas, Picasso and Matisse, Pollock and de Kooning, Freud and Bacon—whose fraught, competitive friendships spurred them to new creative heights. Rivalry is at the heart of some of the most famous and fruitful relationships in history. *The Art of Rivalry* follows eight celebrated artists, each linked to a counterpart by friendship, admiration, envy, and ambition. All eight are household names today. But to achieve what they did, each needed the influence of a contemporary—one who was equally ambitious but possessed sharply contrasting strengths and weaknesses. Edouard Manet and Edgar Degas were close associates whose personal bond frayed after Degas painted a portrait of Manet and his wife. Henri Matisse and Pablo Picasso swapped paintings, ideas, and influences as they jostled for the support of collectors like Leo and Gertrude Stein and vied for the leadership of a new avant-garde. Jackson Pollock's uninhibited style of "action painting" triggered a breakthrough in the work of his older rival, Willem de Kooning. After Pollock's sudden death in a car crash, de Kooning assumed Pollock's mantle and became romantically involved with his late friend's mistress. Lucian Freud and Francis Bacon met in the early 1950s, when Bacon was being hailed as Britain's most exciting new painter and Freud was working in relative obscurity. Their intense but asymmetrical friendship came to a head when Freud painted a portrait of Bacon, which was later stolen. Each of these relationships culminated in an early flashpoint, a rupture in a budding intimacy that was both a betrayal and a trigger for great innovation. Writing with the same exuberant wit and psychological insight that earned him a Pulitzer Prize for art criticism, Sebastian Smee explores here the way that coming into one's own as an artist—finding one's voice—almost always involves willfully breaking away from some intimate's expectations of who you are or ought to be. Praise for *The Art of Rivalry* "Gripping . . . Mr. Smee's skills as a critic are evident throughout. He is persuasive and vivid. . . . You leave this book both nourished and hungry for more about the art, its creators and patrons, and the relationships that seed the ground for moments spent at the canvas."—*The New York Times* "With novella-like detail and incisiveness [Sebastian Smee] opens up the worlds of four pairs of renowned artists. . . . Each of his portraits is a biographical gem. . . . *The Art of Rivalry* is a pure, informative delight, written with canny authority."—*The Boston Globe*

Piet Mondrian Jun 24 2020 Few artists have reinvented themselves as often as Piet Mondrian (1872-1944). From realistic landscapes to his world-famous geometric abstraction, Mondrian accomplished a veritable exploration of modern art. With an unlimited curiosity about the new, he embraced the dynamic life in Amsterdam, Paris, London and New York and translated this into his paintings. This new book follows Mondrian's life and work on the basis of Mondriaan collection of the Gemeentemuseum Den Haag. With more than 300 works, this is the largest collection in the world, covering every phase of Mondriaans impressive career. From the early adventurous landscapes he paints in and around Amsterdam and Domburg, along the fundamental abstraction that he discovers in Laren and Paris, all the way to New York where he discovers a radically new rhythm that his last masterpiece *Victory Boogie Woogie* (1942-1944)). This richly illustrated publication introduces you to one of the most modern artists of the twentieth century! *Mondrian* Dec 19 2019 Piet Mondrian pioneered the de Stijl movement [Dutch for "The Style"] that emerged

in the early 20th century and which served as an important transition from a focus on Symbolism and Realism to a new and growing focus on abstraction. The evolution of Mondrian's initial, traditional style, akin to that of The Hague School, through to his much later works in primary colors and geometric forms, which he called Neo-plasticism, is marked by rather sharp deviations in stylistic form and experimentation along the way, including Cubism and Fauvism. Much of Mondrian's work was greatly influenced by Theosophy, a movement considered to be the genesis of "New Age" beliefs, begun by the Russian occultist Helena Blavatsky in 1875. The goal of her followers was to find inner enlightenment. As Mondrian sought personal inner beauty and the reason for his existence, he sought the same in his art, reducing and simplifying the subjects of his paintings to the true essence of what he perceived as their inner beauty and *raison d'être*. In the company of artists such as Picasso and Dalí, Mondrian's body of work is without question one of the most evolutionary in style and imaginative in content, ranging from excellently executed realistic depictions to the most abstract interpretations of their subjects.

The Affinity of Neoconcretism Jan 20 2020 "The 1950s and early 1960s in Brazil gave birth to a period of incredible optimism and economic development. In *The Affinity of Neoconcretism*, Mariola V. Alvarez argues that the neoconcretists—a group of artists and poets working together in Rio de Janeiro from 1959 to 1961—formed an important part of this national transformation. She maps the interactions of the neoconcretists and discusses how this network collaborated to challenge existing divides between high and low art and between fields such as fine art and dance. This book reveals the way in which art and intellectual work in Brazil emerged from and within a local political and social context, and out of the transnational movements of artists, artworks, published materials, and ideas"—

Mondrian Aug 19 2022 Pieter Cornelis (Piet) Mondriaan werd geboren in Amersfoort op 7 maart 1872 en stierf in New York op 1 februari 1944. Hij was een Nederlandse kunstschilder en kunsttheoreticus, die echter een groot deel van zijn leven in het buitenland woonde en werkte. Mondriaan wordt algemeen gezien als een pionier van de abstracte en non-figuratieve kunst. Vooral zijn latere geometrisch-abstracte werk, met de kenmerkende horizontale en verticale zwarte lijnen en primaire kleuren, is wereldberoemd en dient als inspiratiebron voor vele architecten en ontwerpers van toegepaste kunst. Hij was een van de belangrijkste medewerkers van het tijdschrift *De Stijl* en ontwikkelde een eigen kunsttheorie, die hij *Nieuwe Beelding* of Neo-plasticisme noemde.
