Includes recipes from Le Cordon Bleu cooking school, nutritional analyses, safety information, a glossary of cooking terms, and American, British, and French culinary vocabulary. Anyone can cook in the French manner anywhere, wrote Mesdames Beck, Bertholle, and Child, with the right instruction. And here is the book that, for forty years, has been teaching Americans how. Mastering the Art of French Cooking is for both seasoned cooks and beginners who love good food and long to reproduce at home the savory delights of the classic cuisine, from the historic Gallic masterpieces to the seemingly artless perfection of a dish of spring-green peas. This beautiful book, with more than one hundred instructive illustrations, is revolutionary in its approach because: It leads the cook infallibly from the buying and handling of raw ingredients, through each essential step of a recipe, to the final creation of a delicate confection. It breaks down the classic cuisine

into a logical sequence of themes and variations rather than presenting an endless and diffuse catalogue of recipes; the focus is on key recipes that form the backbone of French cookery and lend themselves to an infinite number of elaborations bound to increase anyone's culinary repertoire. A number of recent books, magazines, and television programs have emerged that promise to take viewers inside the exciting world of professional chefs. While media suggest that the occupation is undergoing a transformation, one thing remains clear: being a chef is a decidedly male-dominated job. Over the past six years, the prestigious James Beard Foundation has presented 84 awards for excellence as a chef, but only 19 were given to women. Likewise, Food and Wine magazine has recognized the talent of 110 chefs on its annual "Best New Chef" list since 2000, and to date, only 16 women have been included. How is it that women—the gender most associated with cooking—have lagged behind men in this occupation? *Taking the Heat* examines how the world of professional chefs is gendered, what conditions have led to this gender segregation, and how women chefs feel about their work in relation to men. Tracing the historical evolution of the profession and analyzing over two thousand examples of chef profiles and restaurant reviews, as well as in-depth interviews with thirty-three women chefs, Deborah A. Harris and Patti Giuffre reveal a great irony between the present realities of the culinary profession and the

traditional, cultural associations of cooking and gender. Since occupations filled with women are often culturally and economically devalued, male members exclude women to enhance the job's legitimacy. For women chefs, these professional obstacles and other challenges, such as how to balance work and family, ultimately push some of the women out of the career. Although female chefs may be outsiders in many professional kitchens, the participants in Taking the Heat recount advantages that women chefs offer their workplaces and strengths that Harris and Giuffre argue can help offer women chefs—and women in other male-dominated occupations—opportunities for greater representation within their fields. Técnicas rompedoras utilizadas por los mejores chefs del mundo "El libro más importante en las artes culinarias desde Escoffier." --Tim Zagat Una revolución está en marcha en el arte de la cocina. Al igual que el impresionismo francés rompió con siglos de tradición artística, en los últimos años la cocina modernista ha franqueado los límites de las artes culinarias. Tomando prestadas técnicas de laboratorio, los chefs de santuarios gastronómicos mundialmente reconocidos, como elBulli, The Fat Duck, Alinea y wd~50, han abierto sus cocinas a la ciencia y a la innovación tecnológica incorporando estos campos de conocimiento al genio creativo de la

elaboración de alimentos. En *Modernist Cuisine: El arte y la ciencia de la cocina*, Nathan Myhrvold, Chris Young y Maxime Bilet --científicos, creadores y reconocidos cocineros-- revelan a lo largo de estos seis volúmenes, de 2.440 páginas en total, unas técnicas culinarias que se inspiran en la ciencia y van de lo insospechado a lo sublime. Las 20 personas que componen el equipo de The Cooking Lab han conseguido nuevos y asombrosos sabores y texturas con utensilios como el baño María, los homogeneizadores y las centrífugas e ingredientes como los hidrocoloides, los emulsionantes y las enzimas. *Modernist Cuisine* es una obra destinada a reinventar la cocina. ¿Cómo se hace una tortilla ligera y tierna por fuera pero sabrosa y cremosa por dentro? ¿O patatas fritas esponjosas por dentro y crujientes por fuera? Imagínese poder envolver un mejillón con una esfera de gelatina de su propio jugo, dulce y salado a la vez. O preparar una mantequilla solo a base de pistachos, fina y homogénea. *Modernist Cuisine* explica todas estas técnicas y le guía paso a paso con ilustraciones. La ciencia y la tecnología de la gastronomía cobran vida en miles de fotografías y diagramas originales. Las técnicas fotográficas más novedosas e impresionantes permiten al lector introducirse en los alimentos para ver toda la cocina en acción, desde las fibras microscópicas de un trozo de carne hasta la sección transversal de una barbacoa Weber. La experiencia de comer y cocinar

bajo una perspectiva completamente nueva. Una muestra de lo que va a descubrir: Por qué sumergir los alimentos en agua helada no detiene el proceso de cocción Cuando cocer en agua es más rápido que al vapor Por qué subir la parrilla no reduce el calor Por qué el horneado es principalmente un proceso de secado Por qué los alimentos fritos se doran mejor y saben más si el aceite se ha utilizado previamente Cómo pueden las modernas técnicas de cocina conseguir resultados perfectos sin el tiempo exacto o la buena suerte que requieren los métodos tradicionales Incluye aspectos cruciales como: Los sorprendentes principios científicos que encierran los métodos tradicionales de preparación de los alimentos, como asar, ahumar y saltear La guía más completa publicada hasta la fecha sobre la cocina al vacío, con las mejores opciones para baños María, materiales de envasado y equipos de sellado, estrategias de cocción y consejos para solucionar problemas Más de 250 páginas sobre carnes, pescados y marisco y 130 páginas sobre frutas, verduras y cereales, incluidas cientos de recetas paramétricas y técnicas paso a paso Extensos capítulos que explican cómo obtener conseguir resultados increíbles utilizando modernos espesantes, geles, emulsiones y espumas, incluidas recetas de muestra y muchas fórmulas Más de 300 páginas de nuevas recetas con presentaciones listas para servirse en restaurantes de alta cocina, además de recetas adaptadas de grandes chefs como Grant
