Handelingen van de algemeene vergadering.
Providing a valuable overview of regionalism
throughout the entire continent, Regionalism in
Modern Europe combines both geographical and
thematic approaches to examine the origins and
development of regional movements and
identities in Europe from 1890 to the present. A
wide range of internationally renowned scholars
from the USA, the UK and mainland Europe are
brought together here in one volume to examine
the historical roots of the current regional
movements, and to explain why some of them -
Scotland, Catalonia and Flanders, among others
- evolve into nationalist movements and even
strive for independence, while others - Brittany,
Bavaria - do not. They look at how regional
identities - through regional folklore, language,
crafts, dishes, beverages and tourist attractions -
were constructed during the 20th century and
explore the relationship between national and
subnational identities, as well as regional and
local identities. The book also includes 7 images,

7 maps and useful end-of-chapter further reading lists. This is a crucial text for anyone keen to know more about the history of the topical - and at times controversial - subject of regionalism in modern Europe. Both historically and theoretically this book deals the work and the life of Joost van den Vondel, the most famous and controversial Dutch playwright in the Dutch Republic. Over twenty-five of his tragedies are analyzed, offering an overview of different theoretical approaches. Historically, Vondel is situated in his own times and in the present. Famous Planet Earth Caves presents information about geologically important caves or rock shelters in different kinds of rock formations all over the world. Each volume of this series is a focused monograph on a single cave. The series covers many disciplines that can be applied to study a cave: geology (cave genesis, sedimentology, speleothems), hydrogeology (speleothems for climate reconstructions, aquifer reconstructions), paleontology (cave bear or carnivore dens), archeology (Palaeolithic to Medieval camp or burial sites) and modern biology. Each volume is beautifully illustrated and written in a simple manner that will be of interest to general readers, speleologists and natural scientists, alike. This volume gives details of Hermann's cave in Rübeland near Wernigerode, Germany. It is one of the largest show caves in Germany and Europe. The cave gives us information about the region in the Ice Age dating back to 350.000 years (which implies its significance in the Late Pleistocene epoch). The cave is a beautiful granite (Brocken Peak) and limestone rock and valley cut landscape. The volume presents information about the Late Pleistocene fauna discovered within the cave and other archaeological findings. Specifically, the volume gives details about the small and large cave bear species within the cave, their ecological relationship to the region (including interactions with steppe lions and Cromagnon humans), and their survival in taiga forest mountain areas of central Europe. This volume continues the premise of the book series on bringing information about fossils and archaeological records of well-known caves to light and will give readers an interesting peek into Hermann's cave by bringing some of its Ice Age stories to life.
