Race for Profit Sep 19 2022 **LONGLISTED FOR THE 2019 NATIONAL BOOK AWARD FINALIST, 2020 PULITZER PRIZE IN HISTORY** By the late 1960s and early 1970s, reeling from a wave of urban uprisings, politicians finally worked to end the practice of redlining. Reasoning that the turbulence could be calmed by turning Black city-dwellers into homeowners, they passed the Housing and Urban Development Act of 1968, and set about establishing policies to induce mortgage lenders and the real estate industry to treat Black homebuyers equally. The disaster that ensued revealed that racist exclusion had not been eradicated, but rather transmuted into a new phenomenon of predatory inclusion. *Race for Profit* uncovers how exploitative real estate practices continued well after housing discrimination was banned. The same racist structures and individuals remained intact after redlining's end, and close relationships between regulators and the industry created incentives to ignore improprieties. Meanwhile, new policies meant to encourage low-income homeownership created new methods to exploit Black homeowners. The federal government guaranteed urban mortgages in an attempt to overcome resistance to lending to Black buyers – as if unprofitability, rather than racism, was the cause of housing segregation. Bankers, investors, and real estate agents took advantage of the perverse incentives, targeting the Black women most likely to fail to keep up their home payments and slip into foreclosure, multiplying their profits. As a result, by the end of the 1970s, the nation's first programs to encourage Black homeownership ended with tens of thousands of foreclosures in Black communities across the country. The push to uplift Black homeownership had descended into a goldmine for realtors and mortgage lenders, and a ready-made cudgel for the champions of deregulation to wield against government intervention of any kind. Narrating the story of a sea-change in housing policy and its dire impact on African Americans, *Race for Profit* reveals how the urban core was transformed into a new frontier of cynical extraction.

White Freedom May 23 2020 The racist legacy behind the Western idea of freedom The era of the Enlightenment, which gave rise to our modern conceptions of freedom and democracy, was also the height of the trans-Atlantic slave trade. America, a nation founded on the principle of liberty, is also a nation built on African slavery, Native American genocide, and systematic racial discrimination. *White Freedom* traces the complex relationship between freedom and race from the eighteenth century to today, revealing how being free has meant being white. Tyler Stovall explores the intertwined histories of racism and freedom in France and the United States, the two leading nations that have claimed liberty as the heart of their national identities. He explores how French and American thinkers defined freedom in racial terms and conceived of liberty as an aspect and privilege of whiteness. He discusses how the Statue of Liberty—a gift from France to the United States and perhaps the most famous symbol of freedom on Earth—promised both freedom and whiteness to European immigrants. Taking readers from the Age of Revolution to today, Stovall challenges the notion that racism is somehow a paradox or contradiction within the democratic tradition, demonstrating how white identity is intrinsic to Western ideas about liberty. Throughout the history of modern Western liberal democracy, freedom has long been white freedom. A major work of scholarship that is certain to draw a wide readership and transform contemporary debates, *White Freedom* provides vital new perspectives on the inherent racism behind our most cherished beliefs about freedom, liberty, and human rights.

The Pursuit of Property Feb 18 2020

The Palgrave Handbook of Race and the Arts in Education Nov 28 2020 The *Palgrave Handbook of Race and the Arts in Education* is the first edited volume to examine how race operates in and through the arts in education. Until now, no single source has brought together such an expansive and

interdisciplinary collection in exploration of the ways in which music, visual art, theater, dance, and popular culture intertwine with racist ideologies and race-making. Drawing on Critical Race Theory, contributing authors bring an international perspective to questions of racism and anti-racist interventions in the arts in education. The book's introduction provides a guiding framework for understanding the arts as white property in schools, museums, and informal education spaces. Each section is organized thematically around historical, discursive, empirical, and personal dimensions of the arts in education. This handbook is essential reading for students, educators, artists, and researchers across the fields of visual and performing arts education, educational foundations, multicultural education, and curriculum and instruction.

Race, Law, and American Society Jul 25 2020 This second edition of Gloria Browne-Marshall's seminal work, tracing the history of racial discrimination in American law from colonial times to the present, is now available with major revisions. Throughout, she advocates for freedom and equality at the center, moving from their struggle for physical freedom in the slavery era to more recent battles for equal rights and economic equality. From the colonial period to the present, this book examines education, property ownership, voting rights, criminal justice, and the military as well as internationalism and civil liberties by analyzing the key court cases that established America's racial system and demonstrating the impact of these court cases on American society. This edition also includes more on Asians, Native Americans, and Latinos. *Race, Law, and American Society* is highly accessible and thorough in its depiction of the role race has played, with the sanction of the U.S. Supreme Court, in shaping virtually every major American social institution.

Family Money Jan 31 2021 *Family Money* explores the histories of formerly enslaved women who tried to claim inheritances left to them by deceased owners, the household traumas of mixed-race slaves, post-Emancipation calls for reparations, and the economic fallout from anti-miscegenation marriage laws. Authors ranging from Nathaniel Hawthorne, Frank Webb, Harriet Beecher Stowe, Charles Chesnut, to Lydia Maria Child recognized that intimate interracial relationships took myriad forms, often simultaneously-sexual, marital, coercive, familial, pleasurable, and painful. Their fiction confirms that the consequences of these relationships for nineteenth-century Americans meant thinking about more than the legal structure of racial identity. Who could count as family (and when), who could own property (and when), and how racial difference was imagined (and why) were emphatically bound together. Demonstrating that notions of race were entwined with economics well beyond the direct issue of slavery, *Family Money* reveals interracial sexuality to be a volatile mixture of emotion, economics, and law that had dramatic, long-term financial consequences.

How the Suburbs Were Segregated Aug 26 2020 The story of the rise of the segregated suburb often begins during the New Deal and the Second World War, when sweeping federal policies hollowed out cities, pushed rapid suburbanization, and created a white homeowner class intent on defending racial barriers. Paige Glotzer offers a new understanding of the deeper roots of suburban segregation. The mid-twentieth-century policies that favored exclusionary housing were not simply the inevitable result of popular and elite prejudice, she reveals, but the culmination of a long-term effort by developers to use racism to structure suburban real estate markets. Glotzer charts how the real estate industry shaped residential segregation, from the emergence of large-scale suburban development in the 1890s to the postwar housing boom. Focusing on the Roland Park Company as it developed Baltimore's wealthiest, whitest neighborhoods, she follows the money that financed early segregated suburbs, including the role of transnational capital, mostly British, in the U.S. housing market. She also scrutinizes the business practices of real estate developers, from vetting homebuyers to negotiating with municipal governments for services. She examines how they sold the idea of the suburbs to consumers and analyzes their influence in shaping local and federal housing policies. Glotzer then details how Baltimore's experience informed the creation of a national real estate industry with professional organizations that lobbied for planned segregated suburbs. *How the Suburbs Were Segregated* sheds new light on the power of real estate developers in shaping the origins and mechanisms of a housing market in which racial exclusion and profit are still inextricably intertwined.

The Whiteness of Wealth Jun 04 2021 A groundbreaking exposé of racism in the American taxation system from a law professor and expert on tax policy NAMED ONE OF THE BEST BOOKS OF THE

YEAR BY NPR AND FORTUNE • “Important reading for those who want to understand how inequality is built into the bedrock of American society, and what a more equitable future might look like.”—Ibram X. Kendi, #1 New York Times bestselling author of *How to Be an Antiracist* Dorothy A. Brown became a tax lawyer to get away from race. As a young black girl growing up in the South Bronx, she’d seen how racism limited the lives of her family and neighbors. Her law school classes offered a refreshing contrast: Tax law was about numbers, and the only color that mattered was green. But when Brown sat down to prepare tax returns for her parents, she found something strange: James and Dottie Brown, a plumber and a nurse, seemed to be paying an unusually high percentage of their income in taxes. When Brown became a law professor, she set out to understand why. In *The Whiteness of Wealth*, Brown draws on decades of cross-disciplinary research to show that tax law isn’t as color-blind as she’d once believed. She takes us into her adopted city of Atlanta, introducing us to families across the economic spectrum whose stories demonstrate how American tax law rewards the preferences and practices of white people while pushing black people further behind. From attending college to getting married to buying a home, black Americans find themselves at a financial disadvantage compared to their white peers. The results are an ever-increasing wealth gap and more black families shut out of the American dream. Solving the problem will require a wholesale rethinking of America’s tax code. But it will also require both black and white Americans to make different choices. This urgent, actionable book points the way forward.

Women, Race, & Class Dec 18 2019 From one of our most important scholars and civil rights activist icon, a powerful study of the women’s liberation movement and the tangled knot of oppression facing Black women. “Angela Davis is herself a woman of undeniable courage. She should be heard.”—The New York Times Angela Davis provides a powerful history of the social and political influence of whiteness and elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women’s rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger’s racism. Davis shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom, housework and child care in this bold and indispensable work.

Critical Race Theory and Copyright in American Dance Dec 10 2021 The effort to win federal protection for dance in the United States was a racialized and gendered contest. Picart traces the evolution of choreographic works from being federally non-copyrightable to becoming a category potentially copyrightable under the 1976 Copyright Act, specifically examining Loïe Fuller, George Balanchine, and Martha Graham.

Martha’s Vineyard Aug 18 2022

Homewreckers Dec 30 2020 “[I] can’t recommend this joint enough. ... An illuminating and discomfiting read.” —Ta-Nehisi Coates “Essential reading.” —New York Review of Books A shocking, heart-wrenching investigation into America’s housing crisis and the modern-day robber barons who are making a fortune off the backs of the disenfranchised working and middle class—among them, Donald Trump and his inner circle. Two years before the housing market collapsed in 2008, Donald Trump looked forward to a crash: “I sort of hope that happens because then people like me would go in and buy,” he said. But our future president wasn’t alone. While millions of Americans suffered financial loss, tycoons pounced to heartlessly seize thousands of homes—their profiteering made even easier because, as prize-winning investigative reporter Aaron Glantz reveals in *Homewreckers*, they often used taxpayer money—and the Obama administration’s promise to cover their losses. In *Homewreckers*, Glantz recounts the transformation of straightforward lending into a morass of slivered and combined mortgage “products” that could be bought and sold, accompanied by a shift in priorities and a loosening of regulations and laws that made it good business to lend money to those who wouldn’t be able to repay. Among the men who laughed their way to the bank: Trump cabinet members Steve Mnuchin and Wilbur Ross, Trump pal and confidant Tom Barrack, and billionaire Republican cash cow Steve Schwarzman. *Homewreckers* also brilliantly weaves together the stories of those most ravaged by the housing crisis.

The result is an eye-opening expose of the greed that decimated millions and enriched a gluttonous few. **On Critical Race Theory** Jul 05 2021 What exactly is critical race theory? This concise and accessible exploration demystifies a crucial framework for understanding and fighting racial injustice in the United States. “A clear-eyed, expert field guide.”—Dr. Tressie McMillan Cottom, author of *Thick* From renowned scholar Dr. Victor Ray, *On Critical Race Theory* explains the centrality of race in American history and politics, and how the often mischaracterized intellectual movement became a political necessity. Ray draws upon the radical thinking of giants such as Ida B. Wells, W.E.B. Du Bois, and Dr. Martin Luther King, Jr., to clearly trace the foundations of critical race theory in the Black intellectual traditions of emancipation and the civil rights movement. From these foundations, Ray explores the many facets of our society that critical race theory interrogates, from deeply embedded structural racism to the historical connection between whiteness and property, ownership, and more. In succinct, thoughtful essays, Ray presents, analyzes, and breaks down the scholarship and concepts that constitute this often misconstrued term. He explores how the conversation on critical race theory has expanded into the contemporary popular conscience, showing why critical race theory matters and why we should all care.

Little White Houses Nov 09 2021 A rare exploration of the racial and class politics of architecture, *Little White Houses* examines how postwar media representations associated the ordinary single-family house with middle-class whites to the exclusion of others, creating a powerful and invidious cultural iconography that continues to resonate today. Drawing from popular and trade magazines, floor plans and architectural drawings, television programs, advertisements, and beyond, Dianne Harris shows how the depiction of houses and their interiors, furnishings, and landscapes shaped and reinforced the ways in which Americans perceived white, middle-class identities and helped support a housing market already defined by racial segregation and deep economic inequalities. After describing the ordinary postwar house and its orderly, prescribed layout, Harris analyzes how cultural iconography associated these houses with middle-class whites and an ideal of white domesticity. She traces how homeowners were urged to buy specific kinds of furniture and other domestic objects and how the appropriate storage and display of these possessions was linked to race and class by designers, tastemakers, and publishers. Harris also investigates lawns, fences, indoor-outdoor spaces, and other aspects of the postwar home and analyzes their contribution to the assumption that the rightful owners of ordinary houses were white. Richly detailed, *Little White Houses* adds a new dimension to our understanding of race in America and the inequalities that persist in the U.S. housing market.

Colored Property Mar 13 2022 Northern whites in the post–World War II era began to support the principle of civil rights, so why did many of them continue to oppose racial integration in their communities? Challenging conventional wisdom about the growth, prosperity, and racial exclusivity of American suburbs, David M. P. Freund argues that previous attempts to answer this question have overlooked a change in the racial thinking of whites and the role of suburban politics in effecting this change. In *Colored Property*, he shows how federal intervention spurred a dramatic shift in the language and logic of residential exclusion—away from invocations of a mythical racial hierarchy and toward talk of markets, property, and citizenship. Freund begins his exploration by tracing the emergence of a powerful public-private alliance that facilitated postwar suburban growth across the nation with federal programs that significantly favored whites. Then, showing how this national story played out in metropolitan Detroit, he visits zoning board and city council meetings, details the efforts of neighborhood “property improvement” associations, and reconstructs battles over race and housing to demonstrate how whites learned to view discrimination not as an act of racism but as a legitimate response to the needs of the market. Illuminating government’s powerful yet still-hidden role in the segregation of U.S. cities, *Colored Property* presents a dramatic new vision of metropolitan growth, segregation, and white identity in modern America.

Caste Mar 01 2021 #1 NEW YORK TIMES BESTSELLER • OPRAH’S BOOK CLUB PICK • “An instant American classic and almost certainly the keynote nonfiction book of the American century thus far.”—Dwight Garner, *The New York Times* The Pulitzer Prize–winning, bestselling author of *The Warmth of Other Suns* examines the unspoken caste system that has shaped America and shows how our lives today are still defined by a hierarchy of human divisions. #1 NONFICTION BOOK OF THE YEAR: Time ONE OF THE BEST BOOKS OF THE YEAR: *The Washington Post*, *The New York*

Times, Los Angeles Times, The Boston Globe, O: The Oprah Magazine, NPR, Bloomberg, The Christian Science Monitor, New York Post, The New York Public Library, Fortune, Smithsonian Magazine, Marie Claire, Slate, Library Journal, Kirkus Reviews Winner of the Carl Sandberg Literary Award • Winner of the Los Angeles Times Book Prize • National Book Award Longlist • National Book Critics Circle Award Finalist • Dayton Literary Peace Prize Finalist • PEN/John Kenneth Galbraith Award for Nonfiction Finalist • PEN/Jean Stein Book Award Longlist • Kirkus Prize Finalist “As we go about our daily lives, caste is the wordless usher in a darkened theater, flashlight cast down in the aisles, guiding us to our assigned seats for a performance. The hierarchy of caste is not about feelings or morality. It is about power—which groups have it and which do not.” In this brilliant book, Isabel Wilkerson gives us a masterful portrait of an unseen phenomenon in America as she explores, through an immersive, deeply researched, and beautifully written narrative and stories about real people, how America today and throughout its history has been shaped by a hidden caste system, a rigid hierarchy of human rankings. Beyond race, class, or other factors, there is a powerful caste system that influences people’s lives and behavior and the nation’s fate. Linking the caste systems of America, India, and Nazi Germany, Wilkerson explores eight pillars that underlie caste systems across civilizations, including divine will, bloodlines, stigma, and more. Using riveting stories about people—including Martin Luther King, Jr., baseball’s Satchel Paige, a single father and his toddler son, Wilkerson herself, and many others—she shows the ways that the insidious undertow of caste is experienced every day. She documents how the Nazis studied the racial systems in America to plan their outcasting of the Jews; she discusses why the cruel logic of caste requires that there be a bottom rung for those in the middle to measure themselves against; she writes about the surprising health costs of caste, in depression and life expectancy, and the effects of this hierarchy on our culture and politics. Finally, she points forward to ways America can move beyond the artificial and destructive separations of human divisions, toward hope in our common humanity. Original and revealing, *Caste: The Origins of Our Discontents* is an eye-opening story of people and history, and a reexamination of what lies under the surface of ordinary lives and of American life today.

The Sum of Us Mar 21 2020 NEW YORK TIMES BESTSELLER • LONGLISTED FOR THE NATIONAL BOOK AWARD • One of today’s most insightful and influential thinkers offers a powerful exploration of inequality and the lesson that generations of Americans have failed to learn: Racism has a cost for everyone—not just for people of color. WINNER OF THE PORCHLIGHT BUSINESS BOOK AWARD • ONE OF THE BEST BOOKS OF THE YEAR: Time, The Washington Post, St. Louis Post-Dispatch, Ms. magazine, BookRiot, Library Journal “This is the book I’ve been waiting for.”—Ibram X. Kendi, #1 New York Times bestselling author of *How to Be an Antiracist* Look for the author’s new podcast, *The Sum of Us*, based on this book! Heather McGhee’s specialty is the American economy—and the mystery of why it so often fails the American public. From the financial crisis of 2008 to rising student debt to collapsing public infrastructure, she found a root problem: racism in our politics and policymaking. But not just in the most obvious indignities for people of color. Racism has costs for white people, too. It is the common denominator of our most vexing public problems, the core dysfunction of our democracy and constitutive of the spiritual and moral crises that grip us all. But how did this happen? And is there a way out? McGhee embarks on a deeply personal journey across the country from Maine to Mississippi to California, tallying what we lose when we buy into the zero-sum paradigm—the idea that progress for some of us must come at the expense of others. Along the way, she meets white people who confide in her about losing their homes, their dreams, and their shot at better jobs to the toxic mix of American racism and greed. This is the story of how public goods in this country—from parks and pools to functioning schools—have become private luxuries; of how unions collapsed, wages stagnated, and inequality increased; and of how this country, unique among the world’s advanced economies, has thwarted universal healthcare. But in unlikely places of worship and work, McGhee finds proof of what she calls the Solidarity Dividend: the benefits we gain when people come together across race to accomplish what we simply can’t do on our own. *The Sum of Us* is not only a brilliant analysis of how we arrived here but also a heartfelt message, delivered with startling empathy, from a black woman to a multiracial America. It leaves us with a new vision for a future in which we finally realize that life can be more than a zero-sum game. LONGLISTED FOR THE ANDREW CARNEGIE MEDAL

Know Your Price Oct 08 2021 The deliberate devaluation of Blacks and their communities has had very real, far-reaching, and negative economic and social effects. An enduring white supremacist myth claims brutal conditions in Black communities are mainly the result of Black people's collective choices and moral failings. "That's just how they are" or "there's really no excuse": we've all heard those not so subtle digs. But there is nothing wrong with Black people that ending racism can't solve. We haven't known how much the country will gain by properly valuing homes and businesses, family structures, voters, and school districts in Black neighborhoods. And we need to know. Noted educator, journalist, and scholar Andre Perry takes readers on a tour of six Black-majority cities whose assets and strengths are undervalued. Perry begins in his hometown of Wilkinsburg, a small city east of Pittsburgh that, unlike its much larger neighbor, is struggling and failing to attract new jobs and industry. Bringing his own personal story of growing up in Black-majority Wilkinsburg, Perry also spotlights five others where he has deep connections: Detroit, Birmingham, New Orleans, Atlanta, and Washington, D.C. He provides an intimate look at the assets that should be of greater value to residents—and that can be if they demand it. Perry provides a new means of determining the value of Black communities. Rejecting policies shaped by flawed perspectives of the past and present, it gives fresh insights on the historical effects of racism and provides a new value paradigm to limit them in the future. Know Your Price demonstrates the worth of Black people's intrinsic personal strengths, real property, and traditional institutions. These assets are a means of empowerment and, as Perry argues in this provocative and very personal book, are what we need to know and understand to build Black prosperity.

Race and Real Estate Jan 23 2023 Race and Real Estate brings together new work by architects, sociologists, legal scholars, and literary critics that qualifies and complicates traditional narratives of race, property, and citizenship in the United States. Rather than simply rehearsing the standard account of how blacks were historically excluded from homeownership, the authors of these essays explore how the raced history of property affects understandings of home and citizenship. While the narrative of race and real estate in America has usually been relayed in terms of institutional subjugation, dispossession, and forced segregation, the essays collected in this volume acknowledge the validity of these histories while presenting new perspectives on this story.

Property Values and Race Studies in Seven Cities Sep 26 2020

Race and Real Estate Feb 24 2023 Through the lens of real estate transactions from 1890 to 1920, Kevin McGruder offers an innovative perspective on Harlem's history and reveals the complex interactions between whites and African Americans at a critical time of migration and development. During these decades Harlem saw a dramatic increase in its African American population, and although most histories speak only of the white residents who met these newcomers with hostility, this book uncovers a range of reactions. Although some white Harlem residents used racially restrictive real estate practices to inhibit the influx of African Americans into the neighborhood, others believed African Americans had a right to settle in a place they could afford and helped facilitate sales. These years saw Harlem change not into a "ghetto," as many histories portray, but into a community that became a symbol of the possibilities and challenges black populations faced across the nation. This book also introduces alternative reasons behind African Americans' migration to Harlem, showing that they came not to escape poverty but to establish a lasting community. Owning real estate was an essential part of this plan, along with building churches, erecting youth-serving facilities, and gaining power in public office. In providing a fuller, more nuanced history of Harlem, McGruder adds greater depth in understanding its development and identity as both an African American and a biracial community.

Colonial Lives of Property Feb 12 2022 In Colonial Lives of Property Brenna Bhandar examines how modern property law contributes to the formation of racial subjects in settler colonies and to the development of racial capitalism. Examining both historical cases and ongoing processes of settler colonialism in Canada, Australia, and Israel and Palestine, Bhandar shows how the colonial appropriation of indigenous lands depends upon ideologies of European racial superiority as well as upon legal narratives that equate civilized life with English concepts of property. In this way, property law legitimates and rationalizes settler colonial practices while it racializes those deemed unfit to own property. The solution to these enduring racial and economic inequities, Bhandar demonstrates, requires developing a new political imaginary of property in which freedom is connected to shared practices of use

and community rather than individual possession.

Critical Race Theory Apr 14 2022 In the past few years, a new generation of progressive intellectuals has dramatically transformed how law, race, and racial power are understood and discussed in America. Questioning the old assumptions of both liberals and conservatives with respect to the goals and the means of traditional civil rights reform, critical race theorists have presented new paradigms for understanding racial injustice and new ways of seeing the links between race, gender, sexual orientation, and class. This reader, edited by the principal founders and leading theoreticians of the critical race theory movement, gathers together for the first time the movement's most important essays.

Property Metamorphosis Oct 28 2020 This book will help you to switch your mindset. You will be provided with the tools that you need to start your own property journey. Create the life that you can't wait to wake up to each day!

The White Possessive Oct 16 2019 The White Possessive explores the links between race, sovereignty, and possession through themes of property: owning property, being property, and becoming propertyless. Focusing on the Australian Aboriginal context, Aileen Moreton-Robinson questions current race theory in the first world and its preoccupation with foregrounding slavery and migration. The nation, she argues, is socially and culturally constructed as a white possession. Moreton-Robinson reveals how the core values of Australian national identity continue to have their roots in Britishness and colonization, built on the disavowal of Indigenous sovereignty. Whiteness studies literature is central to Moreton-Robinson's reasoning, and she shows how blackness works as a white epistemological tool that bolsters the social production of whiteness—displacing Indigenous sovereignties and rendering them invisible in a civil rights discourse, thereby sidestepping thorny issues of settler colonialism. Throughout this critical examination Moreton-Robinson proposes a bold new agenda for critical Indigenous studies, one that involves deeper analysis of how the prerogatives of white possession function within the role of disciplines.

Family Properties Dec 22 2022 Part family story and part urban history, a landmark investigation of segregation and urban decay in Chicago -- and cities across the nation The "promised land" for thousands of Southern blacks, postwar Chicago quickly became the most segregated city in the North, the site of the nation's worst ghettos and the target of Martin Luther King Jr.'s first campaign beyond the South. In this powerful book, Beryl Satter identifies the true causes of the city's black slums and the ruin of urban neighborhoods throughout the country: not, as some have argued, black pathology, the culture of poverty, or white flight, but a widespread and institutionalized system of legal and financial exploitation. In Satter's riveting account of a city in crisis, unscrupulous lawyers, slumlords, and speculators are pitched against religious reformers, community organizers, and an impassioned attorney who launched a crusade against the profiteers—the author's father, Mark J. Satter. At the heart of the struggle stand the black migrants who, having left the South with its legacy of sharecropping, suddenly find themselves caught in a new kind of debt peonage. Satter shows the interlocking forces at work in their oppression: the discriminatory practices of the banking industry; the federal policies that created the country's shameful "dual housing market"; the economic anxieties that fueled white violence; and the tempting profits to be made by preying on the city's most vulnerable population. *Family Properties: Race, Real Estate, and the Exploitation of Black Urban America* is a monumental work of history, this tale of racism and real estate, politics and finance, will forever change our understanding of the forces that transformed urban America. "Gripping . . . This painstaking portrayal of the human costs of financial racism is the most important book yet written on the black freedom struggle in the urban North."—David Garrow, *The Washington Post*

A World More Concrete Jan 19 2020 Connolly argues that Americans, immigrants, and even indigenous people, between the 1890s and the 1960s, made tremendous investments in racial apartheid, largely in an effort to govern growing cities and to unleash the value of land as real estate. Through a focus on South Florida, the book illustrates how entrepreneurs used land and debates over property rights to negotiate the workings of Jim Crow segregation.

Race, Real Estate, and Uneven Development, Second Edition Jul 17 2022 Updated second edition examining how the real estate industry and federal housing policy have facilitated the development of racial residential segregation. Traditional explanations of metropolitan development and urban racial

segregation have emphasized the role of consumer demand and market dynamics. In the first edition of *Race, Real Estate, and Uneven Development* Kevin Fox Gotham reexamined the assumptions behind these explanations and offered a provocative new thesis. Using the Kansas City metropolitan area as a case study, Gotham provided both quantitative and qualitative documentation of the role of the real estate industry and the Federal Housing Administration, demonstrating how these institutions have promulgated racial residential segregation and uneven development. Gotham challenged contemporary explanations while providing fresh insights into the racialization of metropolitan space, the interlocking dimensions of class and race in metropolitan development, and the importance of analyzing housing as a system of social stratification. In this second edition, he includes new material that explains the racially unequal impact of the subprime real estate crisis that began in late 2007, and explains why racial disparities in housing and lending remain despite the passage of fair housing laws and antidiscrimination statutes. Kevin Fox Gotham is Professor of Sociology at Tulane University.

Choreographing Copyright May 03 2021 But the book also uncovers a host of marginalized figures - from the South Asian dancer Mohammed Ismail, to the African American pantomimist Johnny Hudgins, to the African American blues singer Alberta Hunter, to the white burlesque dancer Faith Dane - who were equally interested in positioning themselves as subjects rather than objects of property, as possessive individuals rather than exchangeable commodities. Choreographic copyright, the book argues, has been a site for the reinforcement of gendered white privilege as well as for challenges to it.

Wounds of Returning Sep 07 2021 Adams explores how the commodification of black bodies during slavery did not disappear with abolition--rather, the same principle was transformed into modern consumer capitalism. From Storyville brothels and narratives of turn-of-the-century New Orleans

Each Mind a Kingdom Nov 16 2019 Beryl Satter examines New Thought in all its complexity, presenting along the way a captivating cast of characters. In lively and accessible prose, she introduces the people, the institutions, the texts, and the ideas that comprised the New Thought movement.

Threatening Property Nov 21 2022 White supremacists determined what African Americans could do and where they could go in the Jim Crow South, but they were less successful in deciding where black people could live because different groups of white supremacists did not agree on the question of residential segregation. In *Threatening Property*, Elizabeth A. Herbin-Triant investigates early-twentieth-century campaigns for residential segregation laws in North Carolina to show how the version of white supremacy supported by middle-class white people differed from that supported by the elites. Class divides prevented Jim Crow from expanding to the extent that it would require separate neighborhoods for black and white southerners as in apartheid South Africa. Herbin-Triant details the backlash against the economic successes of African Americans among middle-class whites, who claimed that they wished to protect property values and so campaigned for residential segregation laws both in the city and the countryside, where their actions were modeled on South Africa's Natives Land Act. White elites blocked these efforts, primarily because it was against their financial interest to remove the black workers that they employed in their homes, farms, and factories. Herbin-Triant explores what the split over residential segregation laws reveals about competing versions of white supremacy and about the position of middling whites in a region dominated by elite planters and businessmen. An illuminating work of social and political history, *Threatening Property* puts class front and center in explaining conflict over the expansion of segregation laws into private property.

Race and Property Oct 20 2022 An exploration of housing problems that confront Californians.

The Color of Creatorship Jan 11 2022

Land of the Cosmic Race Apr 21 2020 *Land of the Cosmic Race* is a richly-detailed ethnographic account of the powerful role that race and color play in organizing the lives and thoughts of ordinary Mexicans. It presents a previously untold story of how individuals in contemporary urban Mexico construct their identities, attitudes, and practices in the context of a dominant national belief system. The book centers around Mexicans' engagement with three racialized pillars of Mexican national ideology - the promotion of race mixture, the assertion of an absence of racism in the country, and the marginalization of blackness in Mexico. The subjects of this book are mestizos - the mixed-race people of Mexico who are of Indigenous, African, and European ancestry and the intended consumers of this national ideology. *Land of the Cosmic Race* illustrates how Mexican mestizos navigate the sea of

contradictions that arise when their everyday lived experiences conflict with the national stance and how they manage these paradoxes in a way that upholds, protects, and reproduces the national ideology. Drawing on a year of participant observation, over 110 interviews, and focus-groups from Veracruz, Mexico, Christina A. Sue offers rich insight into the relationship between race-based national ideology and the attitudes and behaviors of mixed-race Mexicans. Most importantly, she theorizes as to why elite-based ideology not only survives but actually thrives within the popular understandings and discourse of those over whom it is designed to govern.

The Color of the Land May 15 2022 *The Color of the Land* brings the histories of Creek Indians, African Americans, and whites in Oklahoma together into one story that explores the way races and nations were made and remade in conflicts over who would own land, who would farm it, and who would rule it. This story disrupts expected narratives of the American past, revealing how identities—race, nation, and class—took new forms in struggles over the creation of different systems of property. Conflicts were unleashed by a series of sweeping changes: the forced "removal" of the Creeks from their homeland to Oklahoma in the 1830s, the transformation of the Creeks' enslaved black population into landed black Creek citizens after the Civil War, the imposition of statehood and private landownership at the turn of the twentieth century, and the entrenchment of a sharecropping economy and white supremacy in the following decades. In struggles over land, wealth, and power, Oklahomans actively defined and redefined what it meant to be Native American, African American, or white. By telling this story, David Chang contributes to the history of racial construction and nationalism as well as to southern, western, and Native American history.

Property Values and Race Jun 16 2022

The Culture of Property Aug 06 2021 This history of the idea of "neighborhood" in a major American city examines the transition of Atlanta, Georgia, from a place little concerned with residential segregation, tasteful surroundings, and property control to one marked by extreme concentrations of poverty and racial and class exclusion. Using Atlanta as a lens to view the wider nation, LeeAnn Lands shows how assumptions about race and class have coalesced with attitudes toward residential landscape aesthetics and home ownership to shape public policies that promote and protect white privilege. Lands studies the diffusion of property ideologies on two separate but related levels: within academic, professional, and bureaucratic circles and within circles comprising civic elites and rank-and-file residents. By the 1920s, following the establishment of park neighborhoods such as Druid Hills and Ansley Park, white home owners approached housing and neighborhoods with a particular collection of desires and sensibilities: architectural and landscape continuity, a narrow range of housing values, orderliness, and separation from undesirable land uses—and undesirable people. By the 1950s, these desires and sensibilities had been codified in federal, state, and local standards, practices, and laws. Today, Lands argues, far more is at stake than issues of access to particular neighborhoods, because housing location is tied to the allocation of a broad range of resources, including school funding, infrastructure, and law enforcement. Long after racial segregation has been outlawed, white privilege remains embedded in our culture of home ownership.

Games of Property Jun 23 2020 In *Games of Property*, distinguished critic Thadious M. Davis provides a dazzling new interpretation of William Faulkner's *Go Down, Moses*. Davis argues that in its unrelenting attention to issues related to the ownership of land and people, *Go Down, Moses* ranks among Faulkner's finest and most accomplished works. Bringing together law, social history, game theory, and feminist critiques, she shows that the book is unified by games—fox hunting, gambling with cards and dice, racing—and, like the law, games are rule-dependent forms of social control and commentary. She illuminates the dual focus in *Go Down, Moses* on property and ownership on the one hand and on masculine sport and social ritual on the other. *Games of Property* is a masterful contribution to understandings of Faulkner's fiction and the power and scope of property law.

Race, Real Estate, and Uneven Development Apr 02 2021 Examines how the real estate industry and federal housing policy facilitate the development of racial residential segregation.
