A family tree assignment leads an adopted girl to discover the different ways to be a family. When her teacher gives her class a simple family tree assignment, Ada is stumped. How can she make her family fit into this simple template? Ada is adopted. She can see where to put her parents on the tree, but what about her birth mom? Ada has a biological sister, but her sister has different adoptive parents — where do they go on the tree? But with the help of her friends and family, Ada figures it out. She creates her family tree . . . and so much more. Loosely based on the author's own experience, this moving story explores the different ways families are created and how the modern family is more diverse and welcoming than ever before. Amidst the shrill and discordant notes struck in debates over the make-up—or breakdown—of the American family, the family keeps evolving. This book offers a close and clear-eyed look into a form this change has taken most recently, the lesbian coparent family. Based on intensive interviews and extensive firsthand observation, *The Family of Woman* chronicles the experience of thirty-four families headed by lesbian mothers whose children were conceived by means of donor insemination. With its intimate perspective on the interior dynamics of these families and its penetrating view of their public lives, the book provides rare insight into the workings of emerging family forms and their significance for our understanding of "family"—and our culture itself. Now in its second edition, *How's Your Family Really Doing?* draws from extensive new research to highlight ten essential keys that define successful families. Providing practical tools for families in any stage of the life cycle, it is concise, engaging, and designed for working moms and dads who are often too busy to pore through lengthier works. Winner of the Book of the Year Award: Foreword Magazine, and The Eric Hoffer Award, *How's Your Family Really Doing?* can help you to: -Learn about healthy families and ways to bring out the best in one other. -Identify family strengths and areas needing improvement. -Facilitate conversations about desired changes. -Strengthen your skills with dozens of tips and tools. -Identify and overcome the effects of past influences. As a society, we have been inundated with "how to books," typically focused on symptoms that one or more family members are experiencing such as anxiety, depression, school problems, out of control behaviors, addictions, etc. But parents buying books about specific symptoms or challenges are often frustrated when trying new techniques without success. That's because these books fail to include what else may be going on in the family that can create or maintain problem behaviors. In contrast, this guidebook provides the reader with a checklist of the most important, underlying "family factors" that can add to efforts at change. The book was conceptualized and written to be more than just a parenting book. It can be used as a reference—like an encyclopedia of family relationships that can be turned to at pivotal moments in the family life cycle. The tips and tools can help family members regardless of whether the kids are still growing up or have left the nest. Equally appropriate for families with toddlers, teens or grandparents, evaluation and change in families is aided by the input of as many participants and generations as possible. It can be used as a pre-marital tool, as preparation for the birth of a child, at a time when a child is symptomatic and the family wants to know why, at the blending of two new families, or at a break-up or a geographical move. Expanding on the stories in her popular column for the website *Waging Nonviolence*, Berrigan has crafted a welcome antidote to the various parenting fads currently on offer from French moms and tiger moms and mean moms. She offers a unique perspective on parenting that derives from hard work, deep reflection, and lots of trial and error. A gentle and light-hearted tale about friends, family, and ferris wheels, Richard and Lewis Edwards-Middleton's debut children's ebook shows a world where there are all kinds of families, and they are all equal. Liam has just one thing on his mind: making it to the ferris wheel to use his ticket. There's just enough time to check out the rest of the carnival, where his friends are playing games, eating popcorn, and going on rides with their parents and guardians. But when Liam's ferris wheel ticket gets lost, it's a race against time for him and his friends to find it. This fun and funny picture ebook represents all sorts of families and all sorts of children. With vibrant illustrations to accompany the narrative, this children's ebook is perfect for adults to share with their little ones to help them understand that we are all different yet also all the same. In this "refreshingly relatable" (Outside) memoir, perfect for the self-isolating family, Slate editor Dan Kois sets out with his family on a journey around the world to change their lives together. What happens when one frustrated dad turns his kids' lives upside down in search of a new way to be a family? Dan Kois and his wife always did their best for their kids. Busy professionals living in the D.C. suburbs, they scheduled their children's time wisely, and when they weren't arguing over screen time, the Kois family—Dan, his wife Alia, and their two pre-teen daughters—could each be found searching for their own happiness. But aren't families supposed to achieve happiness together? In this eye-opening, heartwarming, and very funny family memoir, the fractious, loving Kois' go in search of other places on the map that might offer them the chance to live away from home—but closer together. Over a year the family lands in New Zealand, the Netherlands, Costa Rica, and small-town Kansas. The goal? To get out of their rut of busyness and distractedness and to see how other families live outside the East Coast parenting bubble. *HOW TO BE A FAMILY* brings readers along as the Kois girls—witty, solitary, extremely online Lyra and goofy, sensitive, social butterfly Harper—like through the Kiwi bush, ride bikes to a Dutch school in the pouring rain, battle iguanas in their Costa Rican kitchen, and learn to love a town where everyone knows your name. Meanwhile, Dan interviews neighbors, public officials, and scholars to learn why each of these places work the way they do. Will this trip change the Kois family's lives? Or do families take their problems and conflicts with them wherever we go? A journalistic memoir filled with heart, empathy, and lots of whining, *HOW TO BE A FAMILY* will make readers dream about the amazing adventures their own families might take. It's family time! From bestselling author and parenting expert Dr. Mary Manz Simon comes a devotional story Bible for families! Cultivate a love for God's Word, draw closer to one another, and develop a strong relationship with God by reading Bible stories with your family. Whether you have five minutes or twenty, this illustrated story Bible offers captivating stories from the Old and New Testaments, thoughtful conversation starters, and helpful advice for parents. Perfect for families with kids ages 4-8. Starting a family is a soul-shaping, world-altering experience. Unfortunately, in a culture of competing values and protracted timelines, couples are increasingly backing their way into parenting or missing it altogether. By the time the average couple tries to have kids, they are often beyond their late twenties and surprised to learn they are sliding past the peak of their fertile years. In *Start Your Family*, Steve and Candice Watters encourage couples to be intentional about their timeline in the early years of marriage and to trust God to help them boldly launch their families. Responding to the most common doubts and hurdles, they offer biblical inspiration for the questions: Why have kids? When is the best time to start? How can we fit kids into our lives? There are so many different types of families, and *THE FAMILY BOOK* celebrates them all in a funny, silly, and reassuring way. Todd Parr includes adopted families, step-families, one-parent families, and families with two parents of the same sex, as well as the traditional nuclear family. His quirky humor and bright, childlike illustrations will make children feel good about their families. Parents and teachers can use this book to encourage children to talk about their families and the different kinds of families that

exist. Explains to parents how to talk to children to help them cope when their mother or father is diagnosed with cancer, in a book that also has an illustrated activities section. Introduces different types of households and discusses families with children, adoption, foster parents, same-sex parents, and fertility treatments. The instant New York Times bestseller! * One of Behavioral Scientist's Notable Books of 2021 "Emily Oster dives into the data on parenting issues, cuts through the clutter, and gives families the bottom line to help them make better decisions." -Good Morning America "A targeted mini-MBA program designed to help moms and dads establish best practices for day-to-day operations." -The Washington Post From the bestselling author of Expecting Better and Cribsheet, the next step in data driven parenting from economist Emily Oster. In *The Family Firm*, Brown professor of economics and mom of two Emily Oster offers a classic business school framework for data-driven parents to think more deliberately about the key issues of the elementary years: school, health, extracurricular activities, and more. Unlike the hourly challenges of infant parenting, the big questions in this age come up less frequently. But we live with the consequences of our decisions for much longer. What's the right kind of school and at what age should a particular kid start? How do you encourage a healthy diet? Should kids play a sport and how seriously? How do you think smartly about encouraging children's independence? Along with these bigger questions, Oster investigates how to navigate the complexity of day-to-day family logistics. Making these decisions is less about finding the specific answer and more about taking the right approach. Parents of this age are often still working in baby mode, which is to say, under stress and on the fly. That is a classic management problem, and Oster takes a page from her time as a business school professor at the University of Chicago to show us that thoughtful business process can help smooth out tough family decisions. *The Family Firm* is a smart and winning guide to how to think clearly--and with less ambient stress--about the key decisions of the elementary school years. Parenting is a full-time job. It's time we start treating it like one. "Cute and familiar." - Kirkus From New York Times Best-Selling illustrator, Kathryn Durst, and Penguin Workshop editors and authors, Renee Hooker and Karl Jones, comes a tale of a young girl who imagines her family as a pandemonium of parrots, a swarm of bees, a smack of jellyfish, a wisdom of wombats, and more! When a young girl gets frustrated with her chaotic life at home, she imagines what things would be like if her family were animals instead. Would life be better as a pod of pelicans, a pride of lions, or a herd of buffalo? Or is it ultimately a family of humans that she needs? In this beautifully illustrated book, young readers learn the names for groups of animals through a sweet, whimsical narrative that focuses on the importance of family. When a teacher asks her class to think about what makes their families special, the answers are all different, but the same in one important way ... When a teacher asks the children in her class to think about what makes their families special, the answers are all different in many ways — but the same in the one way that matters most of all. One child is worried that her family is just too different to explain, but listens as her classmates talk about what makes their families special. One is raised by a grandmother, and another has two dads. One has many stepsiblings, and another has a new baby in the family. As her classmates describe who they live with and who loves them — family of every shape, size and every kind of relation — the child realizes that as long as her family is full of caring people, it is special. A warm and whimsical look at many types of families, written by award-winning author Sara O'Leary, with quirky and sweet illustrations by Qin Leng. A provocation to reclaim our disability lineage in order to profoundly reimagine the possibilities for our relationship to disability, kinship, and carework Disability is often described as a tragedy, a crisis, or an aberration, though 1 in 5 people worldwide have a disability. Why is this common human experience rendered exceptional? In *All Our Families*, disability studies scholar Jennifer Natalya Fink argues that this originates in our families. When we cut a disabled member out of the family story, disability remains a trauma as opposed to a shared and ordinary experience. This makes disability and its diagnosis traumatic and exceptional. Weaving together stories of members of her own family with sociohistorical research, Fink illustrates how the eradication of disabled people from family narratives is rooted in racist, misogynistic, and antisemitic sorting systems inherited from Nazis. By examining the rhetoric of genetic testing, she shows that a fear of disability begins before a child is even born and that a fear of disability is, fundamentally, a fear of care. Fink analyzes our racist and sexist care systems, exposing their inequities as a source of stigmatizing ableism. Inspired by queer and critical race theory, Fink calls for a lineage of disability: a reclamation of disability as a history, a culture, and an identity. Such a lineage offers a means of seeing disability in the context of a collective sense of belonging, as cause for celebration, and is a call for a radical reimagining of carework and kinship. *All Our Families* challenges us to re-lineate disability within the family as a means of repair toward a more inclusive and flexible structure of care and community. There is no one size fits all when it comes to families. They can be large or small, blended or shared, here or there. The families in this book might have one dad or two moms. They might have grandparents or not. No brothers or sisters, or a lot! Your family or my family, whatever it's like, it's the perfect fit. The only tradition that matters in these families is that they love each

other. What if we could do better than the family? We need to talk about the family. For those who are lucky, families can be filled with love and care, but for many they are sites of pain: from abandonment and neglect, to abuse and violence. Nobody is more likely to harm you than your family. Even in so-called happy families, the unpaid, unacknowledged work that it takes to raise children and care for each other is endless and exhausting. It could be otherwise: in this urgent, incisive polemic, leading feminist critic Sophie Lewis makes the case for family abolition. Abolish the Family traces the history of family abolitionist demands, beginning with nineteenth century utopian socialist and sex radical Charles Fourier, the Communist Manifesto and early-twentieth century Russian family abolitionist Alexandra Kollontai. Turning her attention to the 1960s, Lewis reminds us of the anti-family politics of radical feminists like Shulamith Firestone and the gay liberationists, a tradition she traces to the queer marxists bringing family abolition to the twenty-first century. This exhilarating essay looks at historic rightwing panic about Black families and the violent imposition of the family on indigenous communities, and insists: only by thinking beyond the family can we begin to imagine what might come after. From an award-winning author comes a funny and honest middle grade novel following Diva Cleopatra as she tries to adapt to her new home and school while coming face-to-face with the school's mean girls. Eleven-year-old Diva is horrified (but not surprised) that her mother's new dream home is a bright pink castle-like house. But the pink palace is only the beginning of a series of new humiliations. While acting as a glitzy mermaid for her Mom's party planning business, Diva is spotted by some classmates who won't let her live it down. When she works up the courage to audition for her new school's play, she's cast in a surprising (and ridiculous) role. But it's when her family throws her a huge surprise birthday party that things really lurch toward disaster. How can Diva stay true to her introverted, under-the-radar self in an in-your-face, over-the-top world? Family is where the heart is. Even though all families are different, home is where your loved ones are! Two foxes - one little, one grown - set out to explore the world. On the way, they discover the many qualities that they share with the animals all around them, as they rest and play, live, and love. This story is a touching and timely celebration of tolerance and unity. Two foxes explore the wonders of the world together. They look out upon the ocean from high upon a hill, travel through the forest where other animals play, and take time to rest next to each other in a meadow when the day becomes too busy. Through their journey, they learn that the world belongs to everyone, and that every creature in the world engages in similar activities, making them all part of one big family. What kind of families do animal babies have? All different kinds! Charming text and sweet illustrations introduce a wolf pup cared for by the pack, a young orangutan snuggling with its mother high in a tree, a poison dart frog tadpole riding piggyback on its dad, and more. Featuring rhyming verse and informational text, this book lets you discover just how diverse the animal kingdom really is!
