Exploring the Emotional Dimensions of Geology Interpretation Nov 29 2020 Interpretation theory states that interpreters should provide visitors with both intellectual and emotional opportunities to connect with natural and cultural resources. Scientific interpretive content lends itself to intellectual connections, but emotional connections prove more challenging. Through the use of data derived from 139 pre- and post-program questionnaires, focus group interviews with 195 visitors, and 37 geology-themed interpretive programs collected at 12 National Parks and Monuments throughout the western United States and Hawaii, this study used a concurrent mixed methods approach to generate grounded theory on the subject of emotionally effective geoscience interpretation. Six strategies for connecting visitors emotionally to geologic resources emerged from the data coding and analysis process, including: 1) Pure connections to provocative geoscience concepts such as time, dynamic processes, and rare phenomena. 2) Aesthetic connections cultivating a link between admiration of beauty and geologic processes. 3) Human-facilitated connections using intense immersion, geologic dangers and benefits, and personal narratives. 4) Biophilia-facilitated connections between living things and

their geologic foundation. 5) Place-facilitated connections leveraging meaningful locales. 6) Tangible-facilitated connections acknowledging the importance of kinesthetic experience. These strategies allow interpreters to frame geology-themed interpretive content in terms of personal relevance to the visitors. The six strategies, combined with empirical and theoretical frameworks from other fields of study, were used to construct a Geology Emotions Model (GEM) that describes the geoscience interpretive experience. The GEM is structured like the Interpretive Equation, $(KR + KA) * AT = IO$. Knowledge of the resource (KR) includes geologic concepts and materials, knowledge of the audience (KA) includes internal and external factors that influence visitor response to the program, appropriate techniques (AT) are the six strategies for effective geology interpretation, and interpretive opportunities (JO) are emotional connections to geologic resources. The results of this study also suggest visitors do not experience intellectual and emotional connections as distinct constructs, and sensory connections may represent a third pathway to interpretive meaning-making. Future research could quantitatively measure the effectiveness of the six strategies discovered in this study, and qualitatively explore the components of the GEM to a greater degree, to better understand the dynamics of the geoscience interpretive process.

Special Issue: The Emotional Dimensions of Leadership

Aug 07 2021

The 3 Dimensions of Emotions Feb 25 2023 Just as there are three dimensions of the physical world (height, width and depth), there are three dimensions of the interpersonal world – power, love, and mindfulness. How well we learn to

navigate them directly corresponds to how well we live our lives, how happy and fulfilled we feel. Human reactivity is the source of most of our interpersonal problems and pain. The 3 Dimensions of Emotions introduces the concept of working the triangle, a unique practice that provides a compelling yet practical road map that can help you move from painful reactivity to productive proactivity in your relationships. And it works just as successfully for a CEO of a Fortune 500 company as it does for a parent struggling to communicate with a teenager. The 3 Dimensions of Emotions is a new way to understand emotional intelligence and find your relational “sweet spot” —the dynamic intersection of power, love, and mindfulness. It will also help you to: Manage difficult people in your life. Improve your emotional intelligence as a partner, parent, and friend. Improve your emotional intelligence as a leader at work.

Mental Health Jan 24 2023 This book takes a comprehensive approach to all aspects of mental health, holistically examining the cognitive, emotional, social, and spiritual dimensions of mental health. By examining mental health from a variety of perspectives, the authors have created a holistic view that incorporates public health, medicine and psychiatry, psychology, counseling, and health education. Both classic and contemporary sources support the basic premise of the text, that total health is a complex tapestry of many wellness factors, but that mental health is the integrating cloth woven throughout that lends substance and support to the quality of human experience. For mental or emotional health counselors.

Psychological Dimensions of the Self Aug 27 2020 Arnold

Buss offers the reader an in-depth look at the developmental aspects of self. In this comprehensive text, Buss uses multiple approaches (cultural, social psychological, developmental, psychoanalytical, personality, and evolutionary) to help the reader better understand the elements of self (e.g., body image, identity, self-consciousness, shyness, guilt, shame, self-discourse, etc.). As he proceeds through each topic, Buss utilizes recurrent themes, arranged as dichotomies that offer a conceptual framework helping the reader see how the various aspects of the self are related. Compare-and-contrast tables in each chapter help students understand different approaches to the self in relation to one another. Chapter-opening outlines, chapter summaries, and chapter glossaries (along with a combined glossary at the end of the book) serve as helpful study aids.

The Emotional and Spiritual Dimensions of Being a Pastor
Nov 17 2019 Emotional labor and its influence on authenticity and identity amongst human service workers has been the focus of numerous studies. Often these studies viewed identity as a stable sense of self. This study set out to examine emotional labor amongst clergy and how it may differ from the emotional labor experienced in other occupations, with the premise that individuals have multiple identities that shift and change depending on the situational context. A thematic analysis of interviews conducted with twenty-seven clergy and a textual analysis of denominational/church texts was conducted to examine the following ideas: 1) how clergy negotiated tensions of authenticity and identity in their work; 2) how clergy described the spiritual and emotional dimensions of their work; 3) how denominational texts address issues of

spiritual and emotional labor; and, 4) if clergy felt enabled and/or constrained by denominational standards and beliefs. The results of this study indicated that emotional and spiritual labor amongst clergy is unique for several reasons. One, the emotional labor clergy engaged in served a positive function because they see it as means of helping others. Second, clergy were aware that emotional labor was intrinsic to the job and they engaged in activities to preempt or manage the tension they felt when the job required them to mask their true feelings and display organizationally preferred feelings. Finally, clergy enjoyed the spiritual dimension of their jobs; thus they were engaged in spiritual work (authentic spirituality), not spiritual labor (inauthentic spirituality). Results also indicated that denominational texts did convey a preferred identity or ideal for how pastors should behave. Pastors indicated that the denominational expectations and guidelines for pastors both enabled and constrained them. The majority of the pastors felt the freedom to disagree civilly and the denomination/church provided venues in which pastors could communicate their dissenting views. However, in some cases, pastors felt the denominational guidelines for the "ideal pastor" were in conflict with how they saw their own role as pastor and they left the denomination. Results also revealed how pastors' identities shifted and changed as the context in which they were ministering changed.

Mentoring the Emotional Dimensions of Leadership May 04 2021

Psychological Dimensions of Juvenile Delinquency Jul 06 2021 Juvenile delinquency is one of the major psycho-social problems of behaviour deviation resulting from emotionless and non caring upbringing of the children. It is believed to

be the widest gateway to crime. That is why, a comprehensive study of delinquency is essential in order to prevent or reduce criminality. This book fills in that gap. It attempts to examine some important psychological dimensions of juvenile delinquency such as self-image, emotional competence, cognitive style and the locus of control among different kinds of delinquents. A comparison is also made of different psychological dimensions of the juvenile delinquents with those of the normal children to delineate the psychological factors related to the development of maladaptive or delinquent behaviour in the juveniles.

Social and Psychological Dimensions of Personal Debt and the Debt Industry Oct 17 2019 An understanding of personal debt requires an understanding of the complex social systems that produce poverty. By drawing upon international perspectives, this book investigates why more and more people are in debt, why it is causing so much mental distress and exactly who is benefiting from what has become the world's number one growth industry.

Social and Psychological Dimensions of Personal Debt and the Debt Industry Jul 26 2020 An understanding of personal debt requires an understanding of the complex social systems that produce poverty. By drawing upon international perspectives, this book investigates why more and more people are in debt, why it is causing so much mental distress and exactly who is benefiting from what has become the world's number one growth industry.

Emotional and Interpersonal Dimensions of Health Services Feb 19 2020 While technological and biomedical breakthroughs have provided a remarkable array of tests, equipment, drugs, and procedures for diagnosing and

treating acute diseases, modern medicine and professional health practices have not taken the same strides in the more human aspects of care. Emotional and Interpersonal Dimensions of Health Services considers ways modern health care practices could benefit from paying more attention to the science of care. influenced by characteristics of the health service organization, such as the administrative structure and the human resources available. They demonstrate that job satisfaction and conditions play an important role in shaping the quality and effectiveness of care and discuss the emotional support health care providers need to avoid long-term exhaustion and ensure well being. The contributors identify qualities of the client-provider interaction that lead to positive health care outcomes, such as providing information, responding to patient concerns, facilitating interactions with the health care system, and encouraging participation in personal health care and offer examples of innovative conceptual and analytical approaches to better health care practices.

Consumer Experiences and Emotion Management Mar 02 2021 Emotions can organize cognitive processes or disorganize them, be active or passive, lead to adaptation, or maladaptation. Consumers may be conscious of their emotions or may be motivated by unconscious emotions. The emotions in combined form with different intensities have an adaptive significance in consumers ' life. Further, the challenges that marketers and researchers face in today ' s global markets are to understand the expression of the emotions or consumer emotional experience. The purpose of this book is to emphasize the value of emotions and explore mental behavioral and emotional dimensions that affect consumers of all age groups, societies, and

cultures. This book is an excellent reference for students, executives, marketers, researchers, and trainers. It includes the different elements of emotion, evidence of how emotions govern and organize consumer life, and emotion and individual functioning, including psychological disorders and well being.

Qualitative Research Aug 19 2022 A book which examines the need for social scientists to include into their research the feelings and emotions of both themselves and their respondents. Qualitative researchers have, in part, insulated their readers from raw emotion, or failed to document the whole of the facts surrounding collection of sensitive data. By taking a professional stance the observer can sometimes miss the reality of what they are observing. People's problems, including the researchers' own subjective biases and feelings, need to be included in all qualitative research. The book argues that the professional stance frequently adopted by observers and observed unconsciously insulates the observer and hence the reader from the true picture. This book examines the worries, fears, feelings and restrictions placed on researchers when observing, recording and interviewing people about their private and sensitive inner feelings and the problems which arise when respondents being studied are in the grip of powerful emotions.

Social and Emotional Dimensions of Continuing Education in Mathematics Apr 15 2022

The Emotions May 16 2022 `There is much that is fascinating here. Long-established experiments and conclusions are rubbished and reinterpreted, long-established assumptions and beliefs about emotions are soundly trounced, and generally a good going-over is

delivered to the whole field... it is such a blockbuster that one can only reel backwards and tell anyone studying the subject that they would be crazy not to get it - Self & Society This fascinating book overviews the psychology of the emotions in its broadest sense, tracing historical, social, cultural and biological themes and analyses. The contributors - some of the leading figures in the field - produce a new theoretical synthesis by drawing together these strands. From the standpoint of the function of the emotions in everyday life, the authors focus on: the discursive role played by the emotions in expressing judgements about, attitudes to and contrition for actions done by the self and others, and how certain emotions - such as guilt, shame, embarrassment, chagrin and regret - seem to play a role in social control; the variation and diversity in emotion, which provides scope for exploring how patterns of emotion contrast in different societies, across gender lines, at different historical times, and between children and adults; and the way in which the body is shaped and its functions influenced by culturally maintained patterns of emotion displays.

Categorical Versus Dimensional Models of Affect Jan 12 2022 One of the most important theoretical and empirical issues in the scholarly study of emotion is whether there is a correct list of basic types of affect or whether all affective states are better modeled as a combination of locations on shared underlying dimensions. Many thinkers have written on this topic, yet the views of two scientists in particular are dominant. The first is Jaak Panksepp, the father of Affective Neuroscience. Panksepp conceptualizes affect as a set of distinct categories. The leading proponent of the dimensional approach in scientific psychology is

James Russell. According to Russell all affect can be decomposed into two underlying dimensions, pleasure versus displeasure and low arousal versus high arousal. In this volume Panksepp and Russell each articulate their positions on eleven fundamental questions about the nature of affect followed by a discussion of these target papers by noted emotion theorists and researchers. Russell and Panksepp respond both to each other and to the commentators. The discussion leads to some stark contrasts, with formidable arguments on both sides, and some interesting convergences between the two streams of work.

Understanding the Relational and Emotional Dimensions of Transitions in Elite Sport Apr 22 2020

Finding Harmony Among Your Eight Dimensions of Age 50+ Total Wellness Dec 19 2019 Older adult wellness involves a lot more than just functional fitness. In addition to diet, exercise, and physical health, wellness also includes stress management, social concerns, emotional health, safety issues, and other factors affecting one's ability to live and enjoy life to its fullest; even financial security, environmental and vocational considerations, and spiritual fulfillment. This book will provide the reader with information, materials, and resources to make informed decisions regarding a well-rounded personal wellness program, incorporating the expanded eight dimensions of older adult wellness illustrated on the next page and finding harmony among them in the process. The traditional seven dimensions of wellness including an "emotional" dimension have been expanded to incorporate an eighth "mental" dimension. Effectively managing both our mental and emotional health can help us to eliminate stress, worry,

anxiety, depression, and other negative feelings. These two separate, yet complimentary dimensions of wellness work together to ensure our overall wellness and ability to effectively interact with others. Additionally, the Vocational dimension has been expanded to include financial wellness as a critical piece of the puzzle for older adults. All eight dimensions of wellness need our personal attention for us to truly flourish. Instead of a balance among all dimensions, the goal is to find harmony among the dimensions that are most authentic for you, including harmony between the mental and emotional dimensions. For example, if the spiritual dimension is not something you find authentic for you, simply bypass it and explore the other dimensions, even though you are encouraged to give each of the dimensions some consideration in your quest for harmony. Harmony requires awareness of self, acceptance of circumstances, and full commitment. It is my hope that the following information and resources within the eight dimensions of older adult wellness will help you develop a wellness plan or refine your existing plan. This author is a former Indiana Educator of the Year credentialed in physical education, health education, coaching, counseling, leadership, and supervision and administration, with newly acquired Advanced Qualification certification as a Professional Senior Personal Trainer from the American Senior Fitness Association. As an advocate for senior citizens and disabled older adults through a faith-based Seasoned Saints initiative in a Skilled Nursing Care Center environment, Lawrence Manor Healthcare Center inspired me to author handbooks for serving both senior residents and skilled caregivers on behalf of Indianapolis based Word of Faith Christian Church. As a senior myself, I have a deep desire to add a total

wellness approach to functional fitness in my advocacy work with older adults from all walks of life. I look forward to helping you enhance your ability to fully live and enjoy life through this book and the Age 50+ Total Wellness Club on behalf of the Age 50 Plus Total Wellness Coaching Limited Liability Company. As the purchaser of this book you are entitled to one free club membership by using the below email address to provide the barcode from the back cover in exchange for a personalized member only access code. DrChalker@age50plustotalwellnesscoaching.com If interested in an Age 50+ Total Wellness presentation or workshop for your senior serving organization, use the below email address to contact the author and owner of the Age 50 Plus Total Wellness Coaching L.L.C. for scheduling. Negotiated presentation fees include all travel expenses and your attendees will receive free memberships to the Age 50+ Total Wellness Club. DrChalker@age50plustotalwellnesscoaching.com

Affective Learning Together Nov 22 2022 'Affective Learning Together' contains in-depth theoretical reviews and case studies in the classroom, of the social and affective dimensions of group learning in a variety of educational situations and taught disciplines, from small groups working on design projects or debating topics in biology and in history in schools.

Care Work and Medical Travel Dec 11 2021 This edited volume explores the interconnection between care work, travel, and healthcare, emphasizing the emotional dimensions of seeking care away from home. It brings together contributions from disciplines such as anthropology, nursing, primary care, sociology and geography and covers experiences of medical travel and

other forms of remote care in the United States, Laos, India, Italy, France, Finland, Switzerland, and Russia.

The Emotional Life of Your Brain Feb 01 2021 What is your emotional fingerprint? Why are some people so quick to recover from setbacks? Why are some so attuned to others that they seem psychic? Why are some people always up and others always down? In his thirty-year quest to answer these questions, pioneering neuroscientist Richard J. Davidson discovered that each of us has an Emotional Style, composed of Resilience, Outlook, Social Intuition, Self-Awareness, Sensitivity to Context, and Attention. Where we fall on these six continuums determines our own “emotional fingerprint.” Sharing Dr. Davidson’s fascinating case histories and experiments, The Emotional Life of Your Brain offers a new model for treating conditions like autism and depression as it empowers us all to better understand ourselves—and live more meaningful lives.

Emotional Dimensions of Healthcare Dec 23 2022 THERE IS AN UNDENIABLE CORRELATION BETWEEN OUR EMOTIONS, UNHEALTHY BEHAVIORS, AND OUR POOR HEALTH OUTCOMES. Something unhealthy is happening in America. We are getting sicker more often and we are dying sooner than we should. Here in the wealthiest, most advanced nation in human history, money and technology alone have not been the answer to preventing disease and promoting good health. Not even providing better access to the existing healthcare system or making medical care cheaper seems to solve the dilemma. But David Woodlock in his new book, Emotional Dimensions of Healthcare, has figured out the problem and offers solutions. Taking the next leap forward in healthcare will mean embracing the

long-overlooked and neglected emotional dimension of our lives. The combination of chronic stress, adverse childhood experiences, and continued negative social determinants such as exposure to community violence and poverty, can have a devastating impact on anyone's physical health. But our current approach to healthcare ignores the emotional component of our well-being. There is hope, however. Mr. Woodlock provides a prescription for smarter, better health, offering innovative approaches already being tried, as well as surveying the best ideas yet to be implemented. The result is a compelling vision of a new era of healthcare that guarantees both longevity and a higher quality of life for millions of Americans. "A deeply sourced, brilliant prescription for what healthcare must be in the 21st century." - Robert Hayes, President & CEO Community Health Network "Woodlock gets] at the heart of our current healthcare system and its regrettably poor outcomes." - Jorge R. Petit, MD, Beacon Health Options "An insightful and profoundly meaningful pathway to better health, lower costs, and a deeper connection between physician and patient." - Linda Rosenberg, President & CEO National Council for Behavioral Health

Popularizing Japanese TV Mar 22 2020 Over the past years, the view has emerged that Japanese TV is dominated by an infotainment mode of discourse. The book extends this view, detailing and interpreting the cultural, economic, and emotional dimensions of this communication phenomenon from an ethnographic perspective. It examines the complex ways in which infotainment works in an

advanced capitalist society. As such, this is more than a book about Japan; it is a work that fits within media ethnography and cultural studies, and appeals to readers interested in the question of how television, at the heart of the global media stream, successfully turns into a persuasive, intimate, and powerful member of a televisual audience-family through carefully engineered televisual discourses, linguistic/non-linguistic component, audiovisual strategies, and economic and cultural elements. Drawing on ethnographic observations in TV stations in two major cities, Sendai and Tokyo, the book reveals several essential components embedded within infotainment discourse. Thus, this book not only provides a panoramic picture of a core phenomenon in Japanese broadcasting since the 2000s but also discusses how both cultural discourses and economic considerations influence contemporary television broadcasting.

The Dimensions of Health Oct 29 2020 The Dimensions of Health: Conceptual Models is an introductory text that examines the five dimensions of personal health: physical, social, emotional, intellectual, and spiritual. Each chapter:

- Provides context for the study of that dimension
- Includes examples of how experts think about that dimension
- Presents two or more models developed by scholars and professionals
- Discusses identifiable characteristics associated with each dimension

By incorporating a variety of perspectives, The Dimensions of Health enables students to formulate their own answer to the question, “ What is health? ” This text is perfect for use in conjunction with a personal health text or as a standalone for any personal health course.

Psychological Dimensions of Executive Coaching Jun 24

2020 What are the critical success factors in effective executive coaching? What are the key competencies of a psychologically-informed coach? What are the similarities and differences between coaching and therapy? This book provides business coaches and management consultants with the framework for a psychological approach to executive coaching. It shows how performance-related issues in the workplace often have a psychological dimension to them and provides the reader with an understanding of how to work in more depth to help people resolve their issues and unlock their potential. It analyzes what constitutes effective coaching, stressing the importance of sound coaching principles, good coaching process, the desirable competencies of the coach, the importance of the coaching relationship and the issue of 'coachability'. It also examines the impact of a stronger psychological approach to coaching, exploring the key psychological competencies required, how to develop them, and the training and supervision issues implicit in this approach. A recurrent theme is the personal development of the coach throughout the coaching process and Peter Bluckert highlights the contribution that the Gestalt perspective offers the coach, through the use of self as instrument of change. Anecdotes, stories and case samples are used throughout the book to illustrate situations so that the reader builds a picture of what psychologically-informed coaching looks like and how to practice ethically, responsibly and competently. Psychological Dimensions to Executive Coaching provides business and executive coaches, management consultants, human resource specialists, corporate executives/senior managers, health/social workers, occupational psychologists, teachers,

psychotherapists and counsellors with the essential information they need to be successful coaches and empower their clients.

Causal Attributions and Emotional Experience Oct 09 2021

Examining the Emotional Dimensions of Academic Librarianship: Emerging Research and Opportunities Jun 17 2022 Longevity and sustainability in a career field is dependent upon a number of factors. Evaluating the mental and emotional issues that academic librarians face can provide solutions to combat the burnout this field is facing in the wake of so many large-scale industry changes. Examining the Emotional Dimensions of Academic Librarianship: Emerging Research and Opportunities is an essential scholarly resource that offers detailed discussion on the latest crises and challenges for librarians and supplies innovative solutions to these issues. Highlighting relevant topics such as emotional exhaustion, research agendas, and deselection, this publication is an ideal resource for librarians, academicians, students, and researchers who have an interest in the mental and emotional landscape of modern library environments.

Components of emotional meaning Mar 14 2022 Publications on emotion (and the affective sciences in general) have exploded in the last decade. Numerous research teams and individual scholars from many different disciplines have published research papers or books about many different aspects of emotions and their role in behaviour and society. However, One aspect of emotional research that has been somewhat neglected, is the way in which emotional terms translate into other languages. When using terms like anger, sadness, fear, disgust, and joy for so-

called basic emotions, as well as terms like shame, guilt, pride, regret and contempt for more complex emotions, it is naturally assumed that the emotion terms used for research in the native language of the researchers and translated into English are completely equivalent in meaning. However, this is not generally the case. In many cases there is no direct one to one relationship between an English term and a term in an alternative language. In fact, there can be significant differences in the way that these seemingly similar emotional terms can be applied across various languages, with important implications for how we review and appraise this work. This book presents an extensive cross-cultural and cross-linguistic review of the meaning of emotion words, adopting a novel methodological approach. Based on the Component Process Model, the authors developed a new instrument to assess the meaning of emotion terms. This instrument, the GRID questionnaire, consists of a grid of 24 emotion terms spanning the emotion domain and 142 emotion features that operationalize five emotion components (Appraisals, Bodily reactions, Expressions, Action tendencies, and Feelings). For the operationalization of these five emotion components, very different emotion models from the Western and the cultural-comparative emotion literature were taken into account. 'Components of Emotional Meaning' includes contributions from psychological, cultural-comparative, and linguistic perspectives demonstrating how this new instrument can be used to empirically study very different research questions on the meaning of emotion terms. The implications of the results for major theoretical debates on emotion are also discussed. For all researchers in the affective sciences, this book is an important new reference work.

Emotional Dimensions of Educational Administration and Leadership Feb 13 2022 Emotional Dimensions of Educational Administration and Leadership explores foundational theories for emotional dimensions of educational administration and leadership as they influence our understanding, analysis and practice in the field. It covers a broad range of topics, such as ethics, authority, personality, social justice, gender discrimination, organisational culture, decision-making, accountability and marketisation. The first section, 'Theoretical Foundations', includes discussion of the early modern romantic philosophy that produced the heroic notion of leadership, the idealist philosophy of Hegel, existential concerns through Kierkegaard, the contributions of psychoanalysis, and Habermasian critical theory. The second section, 'Types of Emotional Analysis', includes examinations of the material culture, emotional economies, the politics of emotion, and the relationship between emotion and rationality. The last section, 'Critical and Contemporary Issues', includes critiques of the fear arising from accountability regimes, the political economy of the market model, a feminist critique of ideologies reflecting emotional investments, narrative expressions for the emotional context of teamwork, the problem of narcissism, and the emotional dimensions of role engagement. This volume explores an area that is only just re-emergent in the last few years. The collection demonstrates the relevance to practical issues and problems internationally, both within the organisational context and extra-organisationally with a focus on the application of emotional factors as they affect our understanding of, and practice in, educational organisations. The emotions of education affect the implementation of political values and

culture within organisations.

Emotional, Sensory, and Social Dimensions of Consumer Buying Behavior Sep 27 2020 Unprecedented changes in consumer shopping habits pose major challenges for retailers who need to consider the multidimensional nature of shopping in order to design and provide engaging consumer experiences. The intersection between in-store and online shopping is also fundamental to meet the fast-changing consumer behavior. Comprehending how environmental and sensory dimensions, leisure, entertainment, and social interactions influence shopper emotions may enhance the shopping experience. Emotional, Sensory, and Social Dimensions of Consumer Buying Behavior is an essential reference source that discusses methods for enhancing the shopping experience in an era of competition among shopping offline- and online-destinations, as well as predicting emerging changes in consumer behavior and shopping destinations and new technologies in retailing. Featuring research on topics such as consumer dynamics, experimental marketing, and retail technology, this book is ideally designed for retail managers, designers, advertisers, marketers, customer service representatives, merchandisers, industry professionals, academicians, researchers, students, and practitioners.

Cognitive and Emotional Dimensions of Empathy Sep 20 2022

Piaget Oct 21 2022

The Social Foundations of Emotion Jul 18 2022 Many researchers today view emotions as biologically-based, evolutionary adaptations to environmental stimuli. In this book, Stefan Hofmann and Stacey Doan argue that emotions cannot be understood without taking into account the

dynamic social and cultural worlds we inhabit. They propose instead a "core self," containing the biological basis for our emotions, and a "social self," which develops over time and embraces the shifting social and cultural influences around us as we grow and learn. Through a wealth of clinical case examples and an expert synthesis of contemporary research, the authors examine how emotions are determined and regulated both internally and externally, via social bonds and feedback. By emphasizing the client's social world, they show clinicians how to understand and offer treatment solutions to common mental health problems, such as depression and anxiety. As the authors demonstrate, socio-cultural context is not just a contributing factor to emotional development; it is, instead, a constant, ubiquitous, and essential element for understanding the complex foundations of human emotion.

Emotional Dimensions of Astrology Nov 10 2021 Barbara Ybarra learned a process of deciphering psychological development in the horoscope from Noel Tyl, who has perfected a system of synthesis using both traditional and modern techniques. As a result, Barbara uses astrology to help people view their lives more proactively and to understand how they are influenced from their early home. Doing this, we can see the pattern of behavior that reinforces our behavior every day. Each of us looks for principles that guide us through life, whatever our spiritual inclination--we need to "feel" what guides us. When we experience deep emotions and are aware of them, we can then tie them to beliefs about where the emotions come from and why we feel them. In turn we can share these when someone asks what we think. To illustrate her approach, Barbara uses the example of Sun square Saturn,

which some astrologers would define as perpetual depression, and writes, "That is not creative thinking. Our lives are given to us for soul growth!" This is the approach Barbara takes in *Emotional Dimensions of Astrology*, while encouraging astrologers and students to think about the importance of feelings in life and to consider what emotions do for us. This book is insightful, spiritual, esoteric, and forward-thinking, and through it Barbara encourages everyone to seek their highest spiritual expression, which is the best gift we can give ourselves.
