*Library Programming for Autistic Children and Teens* May 12 2022 Foreword by Barbara Klipper Since the first edition of this landmark guide was published, there has been increased interest in services for library patrons on the autism spectrum; indeed, more people of all ages now self-identify as autistic. Those who understand the unique characteristics of autistic young people know that ordinary library programming guides are not up to the task of effectively serving these library users. Well qualified to speak to this need, Anderson is an educator, library researcher, and former public librarian who has helped to develop two IMLS funded initiatives that train library workers to better understand and serve autistic patrons. Here, she offers librarians who work with children and teens in both public library and K-12 educational settings an updated, comprehensive resource that includes an updated introduction to the basics of autism, including language, symbolism, and best practices in the library rooted in the principles of Universal Design; step-by-step programs from librarians across the country, adaptable for both public and school library settings, that are cost-effective and easy to replicate; contributions from autistic self-advocates throughout the text, demonstrating that the program ideas included are truly designed with their preferences in mind; suggestions for securing funding and establishing partnerships with community organizations; and many helpful appendices, with handy resources for training and education, building a collection, storytimes, sensory integration activities, and a "Tips for a Successful Library Visit" template.

Born, Not Made: The Entrepreneurial Personality Jul 02 2021 Books, magazine articles, and educational programs on entrepreneurship are all based on the idea that anyone can be an entrepreneur—that entrepreneurs are made, not born. Well, maybe not. In a study of 234 CEOs funded by the Kauffman Foundation, James L. Fisher and James V. Koch came up with a surprising conclusion: Some individuals are simply more naturally fitted to become entrepreneurs than others. They are pre-wired. Because of heredity, some people are much more likely to become successful entrepreneurs or pursue entrepreneurial strategies within a corporate setting profitably. By recognizing that, this book will significantly improve corporate selection processes, strengthen entrepreneurship programs, and boost the confidence of aspiring entrepreneurs through invaluable insights. Among other things, Fisher and Koch show that true entrepreneurs not only see the world differently—they act differently. Compared with corporate managers, for example, they are more confident, more decisive, more likely to upset the apple cart, and more energetic. They love to compete but are notable for the partnerships they are able to fashion with friend and foe alike. Such conclusions are remarkable. Why? Because they are based on the only empirical comparison study yet conducted on entrepreneurship. The insights are not based on personal opinion or case studies but on valid and reliable personality indicators. Because the book shows that certain kinds of people will find it much easier to found successful companies than others, it has many practical applications. It will help organizations fit the right people into jobs requiring an entrepreneurial bent. It will challenge corporations to hire entrepreneurial CEOs who will transform businesses rather than maintain the status quo. And it will speak directly to entrepreneurs and those contemplating starting a business, who will learn if they have the right stuff to start and sustain a business. In short, this book provides insights into the entrepreneurial soul that can change the fortunes of individuals and companies for the better.

**Facebook and Philosophy** Nov 06 2021 Facebook and Philosophy is an entertaining, multi-faceted exploration of what Facebook means for us and for our relationships. With discussions ranging from the nature of friendship and its relationship to "friending," to the (debatable) efficacy of "online activism," this book is the most extensive and systematic attempt to understand Facebook yet. And with plenty of new perspectives on Twitter and Web 2.0 along the way, this fun, thought-provoking book is a serious and significant contribution for anyone working with social media, whether in academia, journalism, public relations, activism, or business. Exploring far-reaching questions — Can our interactions on Facebook help us care about each other more? Does Facebook signal the death of privacy, or (perhaps worse yet) the death of our desire for privacy? — Facebook and Philosophy is vital reading for anyone involved in social networks today.

*Using Focus Groups to Listen, Learn, and Lead in Higher Education* Jun 13 2022 *Using Focus Groups to Listen, Learn, and Lead in Higher Education* presents an easy-to-use 6-step guide to help leaders in higher education listen to and learn from their stakeholders in order to enhance decision making. The big questions facing institutions today, especially those surrounding access, affordability, and accountability, require more than dashboards. Metrics and quantitative data alone do not offer lasting solutions and improvements. Using qualitative methods to listen to the voices of those involved, especially students and staff, is critical. Focus groups constitute the most appropriate, rigorous, and relevant qualitative research tool for this purpose, and one that is cost-effective and builds community when conducted using the ODU Method described in this book. *Using Focus Groups* is a single, comprehensive, and practical resource that describes why, when, and how to use focus groups. The authors provide detailed guidance for using focus groups, from developing the research questions with stakeholders, through training and recruiting moderators, and identifying and recruiting participants, to the logistics of conducting focus groups, and ultimately analyzing data and developing final reports. Conversational vignettes illustrate the discussions that regularly occur in each step and help the reader better understand the process. Fifteen appendices provide templates and examples of every part of the process. Written particularly for institutional research and assessment staff and upper-level administrators, this book will also appeal to deans, department and program chairs and directors, faculty leaders, and administrative unit directors, including those in auxiliary and student services, alumni associations, and university foundations. It also serves as an excellent resource for higher education research methods courses. The authors are uniquely positioned to guide readers in this process. The team developed and refined this technique over two decades at Old Dominion University. They have conducted over 100 focus groups with campus, nonprofit, local, and international community organizations to assist them in assessing student learning, transition, and preparedness for the workforce, as well as evaluating organizations work and planning future projects.

New Approaches to Islam in Film Oct 05 2021 Many global film industries fail in expanding the role of Muslims on screen. Too often they produce a dichotomy between "good" and "bad" Muslims, limiting the narrative domain to issues of national security, war, and terrorism. Naturally, much of the previous scholarship on Muslims in film focused on stereotypes and the politics of representation. This collection of essays, from an international panel of contributors, significantly expands the boundaries of discussion around Muslims in film, asking new questions of the archive and magnifying analyses of particular cultural productions. The volume includes the exploration of regional cinemas, detailed analysis of auteurs and individual films, comparison across global cinema, and new explorations that have not yet entered the conversation. The interdisciplinary collection provides an examination of the multiple roles Islam plays in film and the various ways Muslims are depicted. Across the chapters, key intersecting themes arise that push the limits of how we currently approach issues of Muslims in cinema and ventures to lead us in new directions for future scholarship. This book adds new depth to the matrix of previous scholarship by revisiting methodological structures and sources, as well as exploring new visual geographies, transnational circuits, and approaches. It reframes the presiding scholarly conventions in five novel trajectories: considering new sources, exploring new communities, probing new perspectives, charting new theoretical directions, and offering new ways of understanding conflict in cinema. As such, it will be of great use to scholars working in Islamic Studies, Film Studies, Religious Studies, and Media.

In the diaspora caused by the slave trade, the guiding concepts of the Yoruba spiritual tradition took root in Haiti, Puerto Rico, Cuba, Brazil, and the United States. In this accessible introduction, Baba Ifa Karade provides an overview of the Yoruba tradition and its influence in the West. He describes the sixteen Orisha, or spirit gods, and shows us how to work with divination, use the energy centers of the body to internalize the teachings of Yoruba, and create a sacred place of worship. The book also includes prayers, dances, songs, offerings, and sacrifices to honor the Orisha.
